

TX4 SERIES

ARTICULATED 4-WHEEL DRIVE 24-IN. LOAD CENTER FORKLIFT

TX4 Articulated Forklift Models and Capacities

TX4-250 (25,000-lb. Cap. at 24" L.C., 132" WB)
TX4-300 (30,000-lb. Cap. at 24" L.C., 132" WB)

TX4-360 (36,000-lb. Cap. at 24" L.C., 132" WB)

FAITH VISION WORK

Taylor Machine Works was built on the premise, "We engineer and build what you need." This is just as true today as it was in 1927. We design, engineer, and manufacture equipment tailored specifically to meet the material handling needs of your business. Unlike other comparable articulated machines, this is not a front loader chassis with a fork attachment, but an articulated material handler completely designed and engineered by Taylor Machine Works. With a wide array of attachments available, the TX4 can become the material handler you've been looking for to meet your needs.

optional fork positioning shown

The TX Series features the most dependable and diverse assortment of mast and carriages in its class. Known for their innovative design, these masts give you the confidence in knowing it will work every time you need it. Even when maintenance is required you can feel safe knowing our engineers have designed our mast and carriages to be as easy to maintain and repair as possible.

The telescopic, ULTRA-VU mast features a nested channel construction. The double-acting lift cylinders are positioned to the rear of the mast rails while the multi-leaf lift chains are nested inside the mast rails. The two heavy-duty tilt cylinders have adjustable rod ends and greaseable self-aligning spherical bearings. Two lifting eyes and bolt-on caps permit safe, easy removal of the mast in the event that repair is needed.

The pin-mounted forks are hammer forged from heat treated steel with increased thickness in critical heel sections. The forks are fully adjustable from full width of carriage to +/-2-in. Lengths and widths vary depending on your particular needs and model type.

The mast and carriage main rollers are common and use Timken® tapered roller bearings.

Chain rollers use sealed ball bearings.

Common, cast nylon, side thrust pads are adjustable to compensate for wear.

84-in C-type carriage standard (options available depending on your needs)

Simple design-

- bolt-on housing Timken tapered roller bearings
- cast nylon side thrust pads
- shims, if necessary

Minimal maintenance with more resistant to dynamic/shock loads with rough terrain, high lift, and/or offset loads

The TX4 maintains its rated capacity even at the full steer position.

The TX4 Articulated Series of lift trucks can boast 3 models to choose from. with lift capacities ranging from 25,000-lbs to 36,000-lbs all at 24-in L.C. and 132-in wheelbase.

ARTICULATED

Vertical shielded

exhaust

The TX4 Series of articulated 4-wheel drive forklifts were specifically designed for one task... moving material in the harshest environments imaginable. No matter if it's snow, mud, or rough terrain - the TX4 delivers unparalleled performance.

Designed for optimum performance and dependability, Taylor Machine Works has made sure the very best materials and engineering went into this machine. The most reliable components available are brought together to make a truly unique lift truck.

Hydraulic tank -

- heavy gauge steel wall serviceable filter element
- tank mounted breather
- internal suction screen
- 55-gallon capacity

Full flow, in-tank, 10-Micron return filtration

Pivoting front and rear frames

for maximum control and Maneuverability

Pivoting chassis allows for easy access to internal components

Easy, under cab, access to the junction box and to reset circuit breakers

Forward tilting cab

Sealed electrical connectors

All wiring is color coded and number coded

Fuel tank -

Engine mounted sealed fan shroud insures maximum air flow

High performance pusher fan

130 amp alternator 12V electrical system

ENGINE

- Tier Certified Cummins electronic, low emissions (see specification sheet for engine detail)
- Rated at 165 HP at 2000 rpm for heavy industrial applications (Only on the TX4-250 and TX4-300) (Rated capacity for the TX4-360 is 190 HP at 2200 rpm) Electronic diagnostics on engine with fault code
- history for easy diagnostics and repair
- Built-in emergency shut-down system for engine and transmission
- All service and daily checks can be made easily from the running boards
- High capacity charge air engine coolant, transmission oil and hydraulic oil cooling system
- Easily serviceable bolted 3-section cooling system

TRANSMISSION

- Heavy-duty 4-speed Powershift transmission
- High capacity 12-plate clutch system for added
- Operator controlled hydraulic inching for precise vehicle position control
- Automatic Powershift Control (APC)
- Full directional modulation for soft directional changes
- Transmission oil cooler is part of the bolted 3-section cooling system
- Cooler has wide fin spacing to resist plugging
- Remote mounted filter to reduce oil spills
- Flex-plate drive
- Full width transmission mount goes from rail to rail in chassis for a more stable drivetrain

• 50-gallon capacity
Fuel sensor has no moving parts

Transmission output shaft disc mounted, parking brake Spring on – Hydraulic off Instrument panel mounted control

Remote mounted grease points

4-Wheel Drive Power Large, heavy-duty, all-terrain tires for the harshest working environments

Frame bar can be placed between the articulated sections for transportation or servicing.

NOTE: Please refer to manual for proper maintenance procedures before using.

Heavy-duty bolted planetary drive axle Internal force-cooled wet disc brakes Hydraulic actuated service brakes Brake saver system does not allow operator to drive through parking brakes

Two brake pedals left – brakes and inching right – brakes only

Comfortable adjustable arm rest with fingertip joystick control for smooth precise handling

The TX4 Series features a spacious, all steel cab with increased leg and head room, sound deadening rubber mat flooring, tilt steering wheel, simple T-shaped dash with hinge down instrument panel, fingertip electric joystick controls, and optional climate control system for operator comfort and convenience.

The tilt steering column and the adjustable full-suspension air-ride seat places your operator in the utmost comfort. The right-side armrest's adjustment capabilities allows even the most demanding operator to place the truck's controls within easy reach. The fingertip controls, on the the low effort joystick, allow the operator to control the mast and carriage with ease and comfort. The floorboards are light weight and easily removed.

This blend of ergonomics and technology will help your operator be more efficient with the job at hand... handling materials.

Spacious uncluttered cab with tilt steering, hinge-down dash, climate controls and adjustable seating Premium vinyl or cloth seat that

Easy to understand diagnostic display. TICS (Taylor Integrated Control System) using CANbus technology is standard on the TX Series.

Dual panoramic interior rear view mirrors standard
Dual external side view mirrors standard
Optional pedestrian camera and monitor

The TX4 is where function meets form... this is a true articulated forklift. Designed to do what others cannot, TX4 can and will get the job done.

comfort and noise reduction
Tinted glass throughout the cab

The Best Support in The World!

No-one can match our record for service and reliability.

Worldwide customer service, backed by over 83 years of Taylor® customer satisfaction and trust.

Sudden Service, Inc.
