

Tandem Rollers/Combination Rollers

2,2 t to 3,2 t

Tandem Rollers: BW 100 AD-4, BW 120 AD-4, BW 125 AD-4 Combination Rollers: BW 100 AC-4, BW 120 AC-4, BW 125 AC-4

The global pacesetter in compact tandem rollers

An all-time classic with a new look:

The BW 100 AD-4 and BW 120 AD-4 with 1.0 m and 1.2 m working width are flexible all-round rollers for small to medium construction work. They are suitable for both asphalt and granular materials. These models retain their popularity due to their performance and mobility. On many jobs, they are ideal partners to large tandem rollers. A safe and comfortable design approach encourages superior performance from the operator. The controls are within easy reach. The central multifunction display shows all important information at a glance.

A compact solution to tougher compaction specifications

The BW 125 AD, with an operating weight of over 3 t, has higher compaction output with a 1.2 m working width. This roller gives higher performance, e.g. on thicker asphalt layers or difficult mixes.

The combination rollers BW 100 AC-4, BW 120 AC-4 and BW 125 AC-4 are specialist asphalt models. They combine the high compaction output from the drum with the excellent surface sealing from the 4 rear rubber wheels.

BW 120 AD-4: vibration insulated operator's platform; good visibility across sloped engine hood and angled support legs.

BW 125 AD-4: operating weight over 3 t.

Tailored options increase efficiency

All models are standard equipped to a full specification but a range of options are available: a foldable ROPS provides an alternative to rigid roll over protection. Users appreciate the simple design on site. The edge compactor system from BOMAG includes a conical pressure roll designed for compaction close up to walls without the need for a second follow-up machine.

Option: all-weather protected cab

Option: folding ROPS

Option: edge compactor; compacts close up to curb edge.

Option: lateral shifting seat; twin travel lever available.

Cutting costs with modern BOMAG technology

Less servicing and maintenance

Running costs are just as important as the purchase price. But these costs can be cut where regular maintenance points are partially or fully eliminated. On this compact BOMAG range, important service points are maintenance-free:

- Travel and vibration bearings
- Articulated joint
- Battery

Easy and quick to service: everything has easy access.

In addition there are extended service intervals, e.g. 2,000 hours or 2 years for hydraulic oil and filter. BOMAG compaction technology looks after your money.

The same design efficiency applies to the excellent access to the service areas of the engine, hydraulics and sprinkler system.

Yet more advantages at a glance

- 2 vibration frequencies
For higher flexibility on different jobs. For example, thin layers can be compacted at higher speeds without rippling the surface.
- The highest safety levels
All rollers are equipped with automatic multi disc brakes as service and parking brakes. The EC version also has a seat contact switch where travel movement is only allowed if the seat is occupied.
- Environmentally friendly
Series 4 models already meet the tough "Tier 3" emissions specification. The special frame design ensures the lowest hand/arm/body vibrations and noise levels.

All weather performance: spray nozzles are wind-protected but are still easily accessible.

BOMAG provides local service and support no matter where your next contract is located.

As world market leader in compaction equipment, we offer you the widest range of products backed by expert support and advice aimed at keeping your operation profitable.

Modern manufacturing plants in Germany, USA and China together with licencees and partners around the world supply BOMAG rollers to global markets.

Regional customer care is centred on six branches in Germany, eight subsidiaries in Austria, Canada, China, France, Great Britain, Italy, Japan and USA, one sales office in Singapore and over 500 independent BOMAG dealers.

BOMAG Service. Everywhere and for every need. Our branches and dealers are backed by BOMAG's Central Parts warehouse where about 40,000 parts are held against customer requirements. You expect top service from BOMAG. We aim to provide it.

Quality! For the paint finish of the machine BOMAG as far as possible uses a high quality environmentally friendly powder coating, which excels by its excellent resistance against corrosion, scratching and ultraviolet light.

BOMAG. The world's foremost compaction company.

The machines illustrated may show optional equipment which can be supplied at additional cost. Specifications may change without notice.
