G SERIES 3 ROUGH-TERRAIN FORKLIFTS

586G | 588G

The toughest off-road material handling and lift-and-carry applications require a reliable, durable and comfortable forklift to get the job done. Case G Series 3 rough-terrain forklifts deliver outstanding performance in the roughest of environments. Choose from two heavy-duty models—the 586G or the 588G—to meet your material-handling needs.

Comfort and control

For those long hours on the job, the Case G Series 3 forklifts offer easy-to-operate controls, a choice of seats, and operator compartment entry from either side. Load control is available for smooth operation and minimal chain stress for reduced maintenance cost.

Superior visibility

For safe material handling on the jobsite, the tapered hood and wide-channel dual-mast cylinders provide excellent visibility to the work area, while the compact, low profile design of the Case forklift adds to the machine's overall stability.

Outstanding maneuverability

When you're handling big loads in those tight, narrow spaces that still require the muscle of a full-sized forklift, Case delivers. The 586G and 588G both have zero tail swing, a maximum width of 88 inches (2.24m), and a 55-degree axle turn angle to provide a narrow turning radius.

Impressive lift speed

Case G Series 3 forklifts are among the fastest in the industry with a maximum lift speed of 105 feet (32 m) per minute. Your work day just got more productive!

Ease of maintenance

No one else in the industry does maintenance and service better than Case. Convenient, ground-level service access on Case G Series 3 forklifts saves time during daily checks and contributes to overall productivity. The roller mast design and self-adjusting wet disc brakes increase component life and reduce maintenance cost.

Operator comfort

You'll get more done working in a comfortable environment that features easy-to-operate controls and a choice of seats.

Load control

Load control is available for Case G Series 3 forklifts. It provides smooth forklift operation and minimal chain stress for reduced maintenance cost.

Unrivalled visibility

Field of vision is crucial for forklift operation. Case forklifts are designed to provide the best view to the worksite.

Fast lift speed

With industry-leading lift speed of 105 feet (32 m) per minute at your command, you'll stay productive on the most demanding material handling jobs.

Power to spare

Case rough-terrain forklifts are powered by dependable, Tier III-certified 80 horsepower (60 kW) Case Family engines.

Superior lift capacity

The lift capacity is 6,000 pounds (2722 kg) on the 586G and 8,000 pounds (3628 kg) on the 588G. These machines provide all the lift you need on the job.

Maneuver in tight spaces

Case forklifts combine zero tail swing with a narrow turning radius to allow you to get in and out of the tightest spaces on the job.

Powertrain components

Case rough-terrain forklifts feature the same powertrain components as the industry-leading Case loader/backhoes. Case has sold more than 500,000 loader/backhoes worldwide to meet global demand.

Ease of service

The easier it is to perform daily maintenance on your forklift, the more likely it will get done. Save time during daily checks with ground-level service access

Low ownership cost

When it comes to low ownership cost, the 586G and 588G lead the industry. The reliable Case Tier III-certified engine and powertrain have a two-year, 2,000-hour warranty – one of the best warranties in the business.

You can count on Case

You can count on Case and your Case dealer for full-service solutions—productive equipment, expert advice, flexible financing, genuine Case parts and fast service. We're here to provide you with the ultimate ownership experience.

Case pride

You can take pride in the Case name on your machine. It's backed by more than a century of productivity and performance. Case and your Case dealer are here for you, not only when you buy the machine, but also after you put 1,000 or 10,000 hours on it.

A rich, proud history

Case Construction Equipment's heritage spans more than 165 years. Growing from J.I. Case's innovations with steam-powered machinery in the late 1800s, Case developed road-building equipment that helped create early 20th century streets and highways across the world. By 1912, Case was well on its way to establishing itself as a full-line equipment manufacturer. The company continued to expand its construction equipment business over the next 45 years.

Celebrating a tradition of innovation

In 1957, Case produced the world's first integrated loader/backhoe made and warranted by one manufacturer. Over the decades and into the 21st century, Case has continued to develop a long line of industry firsts and has taken a leadership role in pioneering new products and solutions. Today, Case produces 15 lines of equipment and more than 90 models to meet your toughest construction challenges. Supported by manufacturing and sales in more than 150 countries, Case serves the needs of our customers worldwide.

Coast-to-coast customer support

In North America, Case equipment is sold and serviced by more than 350 dealer locations. No matter where you work, we're here to support and protect your investment.

To locate a Case dealer or learn more about Case equipment or customer service, go to www.casece.com or call 1-866-54CASE6. For flexible financing options, dependable parts and fast service, your Case dealer is here to meet your needs.

It all adds up. You can count on Case.
