

330D MH

Material Handler

Engine

Engine Model	Cat® C9 ACERT™	
Net Flywheel Power	200 kW	268 hp

Weights

Operating Weight	44 627 kg	98,386 lb
------------------	-----------	-----------

Operating Specifications

Max. Reach – 6.1 m (20'0") Stick	14.6 m	47 ft 11 in
Max. Reach – 7.6 m (24'11") Stick	16 m	52 ft 6 in

330D MH Material Handler

The D Series is tough, dependable, and incorporates innovative features for improved performance.

330D MH Material Handler

Special features provide for aggressive performance, reliability, and excellent productivity. **pg. 4**

330D MH Two-Piece Caterpillar® Front Linkage

Caterpillar 330D Material Handler fronts are purpose designed and built for excellent reach, flexibility, and lift performance to meet all requirements of material handling applications. **pg. 5**

Engine

- ✓ ACERT™ Technology works at the point of combustion to optimize engine performance and provide low exhaust emissions to meet U.S. EPA Tier 3 emission regulations, with exceptional performance capabilities and proven reliability. **pg. 6**

More powerful engine, improved cooling system, increased hydraulic pressure, and cab riser options lead to increased productivity and lower operating cost.

Structures

The 330D MH structural components are the backbone of the machine's durability and provide for excellent stability. **pg. 7**

Work Tools – Attachments

A variety of grapples and magnets are available to maximize machine performance in material handling applications. **pg. 8**

Serviceability and Complete Customer Support

Your Cat® dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment. **pg. 9**

✓ *New Feature*

330D MH Material Handler

Special features provide for aggressive performance, reliability, and excellent productivity.

Fixed Riser. Cat® designed and built, 1.95 m (6'5") manual tilt cab riser provides for operating height with excellent visibility for loading and unloading processing equipment, trucks, and rail cars. Access to the cab is provided by a ladder to the platform extending around the cab riser. This platform allows for windshield cleaning. The cab riser can be manually tilted forward 90 degrees for shipping.

Hydraulic Cab Riser. Optional hydraulic cab riser provides up to 2.6 m (8'6") of additional operating height. There is easy access to the cab platform provided by handrails attached to the riser.

Operator Controls. The ability to modulate grapple open-close function is provided on the right side joystick. The rotate function is also modulated by using a slider switch mounted on the joystick.

Cooling System. External debris filters allow easy access for cleaning. This prevents clogging from dirt and dust entering the cooling system. The optional automatic reversing fan purges dirt and dust from the cooling system.

Generator Set. A 20 kW (26.8 hp) hydraulically driven generator set can power magnets up to 1.68 m (66") in diameter.

330D MH Two-Piece Caterpillar Front Linkage

Caterpillar 330D Material Handler fronts are purpose designed and built for excellent reach, flexibility, and lift performance to meet all requirements of material handling applications.

Cat® Two-Piece Front Linkage.

Offers a maximum horizontal reach of 16 m (52'6") from swing center and maximum vertical reach of 16.9 m (55'5"). This front is an excellent match for the 0.96 m³ (1.25 yd³) grapple or a 1.68 m (66") magnet.

An optional 14.6 m (47'1") two-piece front linkage has a maximum vertical height of 15.8 m (51'11"). This front is an excellent match for the 1.15 m³ (1.5 yd³) Orange Peel Grapple or the 1.68 m (66") Walker magnet.

Material Handling Booms and Sticks.

Designed and built for performance and long service life.

Welded Box-Section Structures.

Efficiently designed with thick, multi-plate fabrications in high stress areas, which allows structures to flex, dissipating stress and maximizing strength.

Stress Relieving Booms and Sticks.

Maximizes strength and minimizes structure weight.

Dual Stick Cylinders. Provides excellent geometry for working close in to the machine or at full reach.

Heavy Lift. Provides additional lift capacity for handling of heavy, robust objects.

Engine

ACERT™ Technology meets U.S. EPA Tier 3 emission regulations, with exceptional performance capabilities and proven reliability.

Engine. Six-cylinder, turbocharged engine built for power, reliability, and economy will allow the machine to consistently perform at high levels. The Cat® C9 engine is designed for low emissions and will meet EPA Tier 3 emissions requirements.

Performance. The 330D MH, equipped with the C9 engine with ACERT™ Technology, provides 9% more horsepower as compared to the C9 in the 330C MH.

Electronic Control Module.

The Electronic Control Module (ECM) works as the “brain” of the engine’s control system, responding quickly to operating variables to maximize engine efficiency. Fully integrated with sensors in the engine’s fuel, air, coolant, and exhaust systems, the ECM stores and relays information on conditions such as RPM, fuel consumption, and diagnostic information.

Automatic Engine Control Speed.

The two-stage, one-touch control maximizes fuel efficiency and reduces sound levels.

ADEM™ A4 Engine Controller.

The ADEM™ A4 electronic control module manages fuel delivery to get the best performance per liter of fuel used. The engine management system provides flexible fuel mapping, allowing the engine to respond quickly to varying application needs. It tracks engine and machine conditions while keeping the engine operating at peak efficiency.

Structures

The 330D MH structural components are the backbone of the machine's durability and provide for excellent stability.

High and Square Undercarriage.

Provides excellent over-the-side stability required to handle heavy loads and improve productivity.

Provides excellent ground clearance required to clear obstacles.

Stands up in the toughest applications.

Modified X-shaped, box-section carbody provides excellent resistance to torsional bending.

Upper structure weight and stresses are distributed evenly across the full length of the track roller frame.

Robotic Welding. Up to 95% of the structural welds are done robotically, which achieves up to three times the penetration of manual welds for improved durability.

Heavy Duty Upper Frame. The upper frame is specifically designed for the scrap and material handling applications. It is built of higher strength material and thicker steel sections to handle increased swing loads from the longer front and heavier counterweights used in material handling.

Work Tools – Attachments

A variety of grapples and magnets are available to maximize machine performance in material handling applications.

Walker Magnets. The Walker 1.68 m (66") Lift Master magnet can be used with the 330D MH. These magnets have been designed and engineered for scrap processing applications. Ask your dealer salesperson for information on the Walker Magnet.

Orange Peel Grapples. The 0.96 m³ (1.25 yd³) and the 1.15 m³ (1.5 yd³) Orange Peel Grapples are available attachments.

Work Tool Selection. When choosing a work tool, please consider the work tool application, the variation of the density of material to be handled and productivity requirements. Check with your Cat® dealer for more details on specifications, sizes, and other work tool types.

Serviceability and Complete Customer Support

Simplified service and maintenance features save you time and money. Your Cat® dealer offers a wide range of services that can be set up under a customer support agreement when you purchase your equipment.

Ground Level Service. The design and layout of the 330D MH was made with the service technician in mind. Many service locations are easily accessible at ground level allowing critical maintenance to get done quickly and efficiently.

Pump Compartment. A service door on the right side of the upper structure allows ground-level access to the pump and pilot filter.

Radiator Compartment. The left rear service door allows easy access to the engine radiator, oil cooler, and air-to-air-after-cooler. A reserve tank and drain cock are attached to the radiator for simplified maintenance.

Air Filter Compartment. The air filter features a double-element construction for maximum cleaning efficiency. When the air cleaner plugs, a warning is displayed on the monitor inside the cab.

Capsule Filter. The hydraulic return filter, a capsule filter, is situated outside the hydraulic tank. The filter prevents contaminants from entering the system when hydraulic oil is changed and keeps the operation clean.

Fan Guard. Engine radiator fan is completely enclosed by fine wire mesh, reducing the risk of an accident.

Diagnostic and Monitoring. The 330D MH is equipped with S•O•SSM sampling ports and hydraulic test ports for the hydraulic system, engine oil, and for coolant. A test connection for the Cat® Electronic Technician (Cat® ET) service tool is located in the cab.

Extended Service Interval. The 330D MH service and maintenance intervals have been extended to reduce machine service time and increase machine availability.

Cat® Dealer Maintenance. Choose from your Cat® Dealer's wide range of maintenance services at the time you purchase your machine. Preventive Maintenance will help you to avoid unscheduled repairs and diagnostic programs such as Scheduled Oil Sampling and Technical Analysis are available.

Product Support. You will find nearly all parts at our dealer parts counter. Cat® Dealers utilize a worldwide computer network to find in-stock parts to minimize machine downtime. You can also save money with remanufactured components.

Machine Selection. Make detailed comparisons of the machines you are considering before you buy. What are the job requirements, machine attachments and operating hours? What production is needed? Your Cat® dealer can provide recommendations.

Customer Support Agreements. Cat® Dealers offer a variety of product support agreements, and work with customers to develop a plan that best meets specific needs. These plans can cover the entire machine, including attachments, to help protect the customer's investment.

Engine

Engine Model	Cat® C9 ACERT™	
Net Flywheel Power	200 kW	268 hp
Net Power – ISO 9249	200 kW	268 hp
Net Power – SAE J1349	188 kW	252 hp
Net Power – EEC 80/1269	200 kW	268 hp
Bore	112 mm	4.41 in
Stroke	149 mm	5.87 in
Displacement	8.8 L	537 in ³

- The 330D MH meets the U.S. Tier 3 exhaust emissions requirements.
- Net Power advertised is the power available at the flywheel when the engine is equipped with fan, air cleaner, muffler, and alternator.
- No engine power derating required below 2300 m (7,500 ft).

Operating Specifications

Cab Riser – Fixed	1.96 m	6 ft 5 in
Cab Riser – Hydraulic	2.6 m	8 ft 6 in
Generator Set	20 kW	26.8 hp
Max. Reach – 6.1 m (20'0") Stick	14.6 m	47 ft 11 in
Max. Reach – 7.6 m (24'11") Stick	16 m	52 ft 6 in

Hydraulic System

Maximum Flow (each of two pumps)	280 L/min	74 gal/min
Max. Pressure Implements	35 000 kPa	5,076 psi
Max. Pressure – Heavy Lift	36 000 kPa	5,221 psi
Max. Pressure Travel	33 784 kPa	4,900 psi
Max. Pressure – Swing	29 400 kPa	4,264 psi
Pilot System Max. Flow	43 L/min	11 gal/min
Pilot System Max. Pressure	3900 kPa	566 psi

* Indicates that the load is limited by hydraulic capacity rather than tipping capacity. Lift capacity ratings are based on SAE J2518. Rated payloads do not exceed 87% of hydraulic lifting capacity or 75% of tipping capacity. All lift values are shown with heavy lift on. Always refer to the appropriate Operation and Maintenance Manual for specific product information.

Standard Equipment

Standard equipment may vary. Consult your Caterpillar dealer for details.

BOOM

9.2 m (30'2") MH Boom

Includes high pressure twig welded steel tubes

ELECTRICAL

80 ampere alternator

Working lights, cab mounted (two)

Horn

Light, storage box mounted

OPERATOR ENVIRONMENT

Bolt on FOGS capability

Polycarbonate windows except laminated glass in retractable front windshield/tempered glass in removable lower windshield and sliding upper door window

Rear window exit

KAB 84/E4P suspension seat with adjustable armrest and 76 mm (3") retractable seat belt (cloth)

Monitor

Full graphic and full color display with language capability, warning information, filter, and fluid

Working hour information

Machine condition, error code and tool mode setting information

Start up level check for hydraulic oil, engine oil, and engine coolant change information

Pop-Up skylight, with sunscreen

Windshield wiper/washers (upper/lower)

Positive filtered ventilation

Bi-level air conditioner with auto climate control heater and defroster

Instrument panel and gauges

Interior lighting

Coat hook

Ashtray with lighter

Literature compartment

Storage compartment suitable for a lunch box

Neutral lever for all controls

Pre-start monitoring system (alert if there is a shortage of hydraulic oil, engine oil, or engine coolant)

Modulated grapple open-close controls using RH joystick

Toggle switch in RH console to switch between magnet and grapple operation

Travel control pedals with removable hand levers

Platform next to cab for improved access

Washable floor mat

Sunscreen on windshield

Beverage holder

AM/FM Radio with two stereo speakers

POWER TRAIN

Cat® C-9 Diesel engine with 24V electric starting

Emissions package to meet EPA Tier 3 requirements

Radial seal air filter

Automatic engine speed control with manual return to idle (not functional when hydraulic generator is in operation)

Water separator in fuel line

Power mode selector (2 modes)

Two speed auto-shift travel

Side by side cooling package

Removable external debris filter covering air inlets (Hi-Ambient)

Straight line travel

Muffler

Air precleaner

Block Heater

Electric priming pump

UNDERCARRIAGE

High square carbody

Hydraulic track adjusters

Track type undercarriage with grease lubricated seals

Idler and rear section track guiding guards

600 mm (24") triple grouser shoes (49 sections)

Heavy duty track rollers

OTHER STANDARD EQUIPMENT

Heavy duty upper frame with bottom guards

Door locks, caps locks, and Caterpillar one key security system

Mirrors (frame-right, cab-left)

8330 kg (18,375 lb) Material Handling Counterweight

Automatic swing parking brake

Fine swing control

Travel alarm

Ether and cold weather starting aids

Secondary engine shut off switch

Extra batteries/Heavy duty starter

Cold Start receptacle

Crosshead adapter

Product Link ready

HYDRAULIC SYSTEMS

Fully pressurized hydraulic system

Auxiliary pump and lines to drive generator

Medium pressure auxiliary hydraulic circuit for powering rotating grapples (includes pump, valve with flow control and lines)

High pressure grapple open/close hydraulic circuit, flow control on grapple open and shutoff valves at end of stick

Regeneration circuit for boom and stick

Boom and stick lowering check valve

Heavy Lift Mode

Optional Equipment

Optional equipment may vary. Consult your Caterpillar dealer for details.

One of two stick options MUST be chosen:

Stick, 7.6 m (24'11") Material Handling

Stick, 6.1 m (20'1") Material Handling

One of two cab riser options MUST be chosen:

1.9 m (6'5") manual tilt cab riser

2.6 m (8'6") hydraulic cab riser

Guard, falling objects

Fan, auto reversing

Exit, secondary rear window with an internal and external opening provisions mandatory for Province of British Columbia, Canada

20 kW (26.8 hp) hydraulic driven solid state genset

Magnet-Scrap Handling

1.68 m (66") Walker Lift Master Series

Grapple-four tine, Orange Peel

0.96 m³ (1.25 yd³)

1.15 m³ (1.5 yd³)

330D MH Material Handler
