### 621G, 623G, 627G Scrapers

Highly productive earthmoving machines, built to last.

### **Power Train**

Electronically controlled Caterpillar<sup>®</sup> engines and automatic planetary powershift transmissions are electronically integrated to provide maximum power to the cutting edge and exceptional haul road speed. **pg. 4** 

### **Cushion Hitch**

Electrically actuated hydraulic damper absorbs haul road shocks for increased operator comfort. **pg. 5** 

### Scraper Bowl

Caterpillar Scraper bowls are designed to provide fast cycle times for high productivity. **pg. 5** 

### **Push-Pull Arrangement**

Designed for maximum productivity while providing the flexibility for selfloading, push-pull loading or standard push loading. **pg. 9** 

### **Elevator Arrangement**

Provides true self-loading capability. Infinitely variable forward and reverse speeds match loading speed to material. Well suited for production as well as finish work. **pg. 10** 

### **Operator Station**

Convenient control placement and a comfortable work environment are keys to high productivity. Features include electro-hydraulic controls, a new air seat suspension and improved instrumentation. **pg. 6** 

### **Enhanced Control Layout**

Three implement levers have been combined into a simple and easy to operate joystick, enhancing the productivity of experienced and inexperienced operators alike. **pg. 7** 

### **Open Bowl Arrangement**

Provides aggressive material penetration for traditional push-loading applications. **pg. 8** 

### **Auger Arrangement**

Provides self-loading capability with the same wide material appetite as an open bowl machine. **pg. 11** 

#### Serviceability & Complete Customer Support

Designed for easy maintenance and repair, the new G-Series machines are backed by total Caterpillar committment to customer support. **pgs. 12, 13** 

# **Power Train**

*Proven components are electronically integrated to achieve new levels of performance and efficiency.* 

**3406E Engine.** The six-cylinder, turbocharged, electronically controlled engine is built for power, reliability, and economy.

**Electronic Controls.** The Electronic Control Module (ECM) responds to operator commands and engine sensor input to optimize engine and machine performance.

**High Torque Rise.** Provides increased power in the cut.

**Dual Horsepower.** Provides increased power during operation of the auger or elevator mechanisms. It also provides increased power when the machine is operating in the higher gear ranges for enhanced haul road speed.

**Transmission.** Electronically controlled Caterpillar planetary powershift transmission with eight forward and one reverse speed. Gears one and two operate in converter drive for increased torque capability during the cut and fill. Gears three through eight operate in direct-drive for drive train efficiency during the haul. Reverse operates in converter drive.

### **Electronic Control Throttle Shifting**

**(CTS).** Automatically synchronizes engine speed to transmission speed during shifting to reduce power train stress and increase component life.

**Transmission Hold Switch**. Allows the operator to maintain converter drive in first and second gear for increased rimpull, or hold the current gear for enhanced control.

### **Programmable Top Gear Selection.**

Provides improved flexibility to match the hauling speed of the fleet to specific job site speeds.

### **Cushion Hitch**

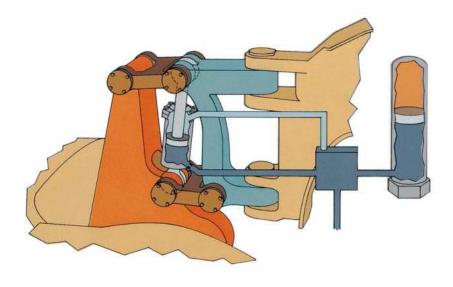

Delivers a smoother ride for enhanced operator comfort.

### Parallelogram-Type Linkage. The

electronically actuated cushion hitch incorporates a parallelogram-type linkage for exceptional strength.

**Nitrogen Accumulators.** Absorb and dampen road shocks.

**Lockout Switch.** Improves control of the cutting edge during loading and dumping.

# **Scraper Bowl**

Designed for optimum loading, material retention and ejection.

**Low Profile Design.** Offers less resistance to incoming material which allows the load to build quickly.

**Bulldozer Ejection System.** Provides quick material ejection and reduced carry-back for increased productivity.

### **Ground Engaging Tools.**

• Cutting edges are reversible to help provide long life. Different thicknesses are available for different applications. For optimal performance use the thinnest edge that provides satisfactory wear life and impact resistance.

• Optional teeth are available in several different configurations that can penetrate material better than a cutting edge without teeth.

### **Operator Station**

Redesigned for enhanced operator comfort and productivity.

**Sound Suppression.** Sound suppressed, rubber mounted ROPS cab reduces sound and vibration for comfort.

**Steering Column.** Redesigned to increase operator legroom by 11 percent.

### Instrumentation:

**Quad Gauge Cluster.** Provides fluid level and temperature information at a glance.

**Electronic Speedometer/Tachometer** provides actual gear indication readout.

**Electronic Monitoring System (EMS II)** monitors machine status and provides real time information to the operator.

**Switch Console.** Provides enhanced visibility and convenience by moving the less frequently used switches to the headliner.

**Seat.** The new Cat Comfort Cloth Seat offers improved comfort with a newly designed air seat suspension.

• Swivels and locks in four positions (0 to 30 degrees) to ensure proper orientation of the operator to the joystick.

• Fore/aft and vertical height adjustment to accommodate various sized operators.

**Air Conditioning**. Now standard. Improved ventilation enhances airflow in the cab.

**Storage and Amenities.** Convenient storage compartments include space for a lunch box and first aid kit. Also features a cup holder and ashtray.

### **Enhanced Control Layout**

*Features an electro-hydraulic implement control and electronic gear selector for increased operator efficiency.* 

**Joystick Control.** Simple and easy to operate, enhancing the productivity of operators of all skill levels. Requires 25 percent less force to control the critical scraper functions and requires 40 percent less stick movement than before.

**Transmission Control.** Simplifies gear selection and provides operator-defined top gear control.

#### **Joystick Functions.**

• Forward/Reverse - Bowl raise/lower and quick drop

• Left/Right - Ejector direction

• Thumb Rocker - Apron position (621G/627G only), Elevator speed and direction (623G only) • Trigger Switch - Auger on/off (621G/627G only), Set elevator speed (623G only), Bail up/down (627G only)

• Thumb Switches - Transmission hold and cushion hitch controls

# Open Bowl (621G/627G only)

Highly productive earthmoving machines, built to last.

**Material Application.** Well suited to handle a wide variety of material from clay to shot rock.

**Push-Loading.** To achieve maximum productivity, the 621G and 627G should be push loaded by either a D8R or D9R Track-Type Tractor.

**Tandem Engine**. Provides the ability to handle steep grades as well as all wheel drive to handle soft, slippery underfoot conditions.

**Dual Horsepower.** Provides increased horsepower during the haul which results in faster cycle times.

# Push-Pull Arrangement (627G only)

Wide material appetite with high production capability.

**Material Application.** Well suited to handle a wide variety of material.

**Push-Loading.** Working together, pushpull scrapers combine to place over 1000 horsepower on a single cutting edge. Fast loading means short cycle times. **Tandem Engine**. Provides the ability to handle steep grades as well as all wheel drive to handle soft, slippery underfoot conditions.

**Dual Horsepower.** Provides increased horsepower during the haul which results in faster cycle times.

**Maximum Productivity.** Push-pull scrapers can provide the lowest cost-per-yard for any scraper application.

### Elevator (623G only)

Work-alone capability reduces the operating cost-per-ton.

**Material Application.** Work alone capability makes it ideal for picking up windrows, soil mixing, as well as cleanup and production work. Conditions material which promotes compaction in the fill.

**Elevator Mechanism.** The elevator lifts material off of the cutting edge and carries it to the top of the load for true self-loading capability.

**Single Pivot Design**. Enhances material loading and improves the load profile to consistently achieve capacity loads.

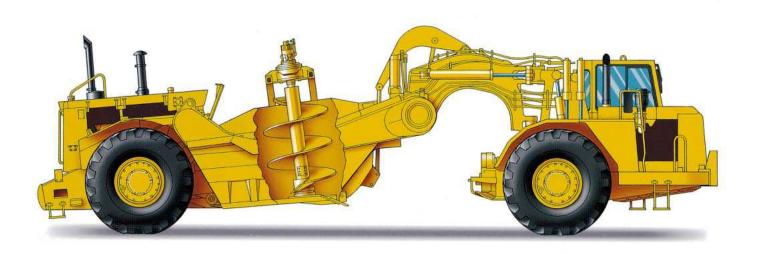

**Elevator.** Infinitely variable speed elevator allows the operator to match the elevator speed to the material. High speed loading is available for normal conditions and windrows; low speed for tough materials. **Reverse Function.** The elevator reverses for spreading top soil and unloading cohesive material and blending windrowed material.

**Hydraulic Chain Adjuster** simplifies chain adjustment which is critical to achieving long chain life.

**Dual Horsepower.** The dual horsepower provides increased horsepower to the elevator during loading and unloading for enhanced performance.

# Auger Arrangement (621G/627G only)

Excellent self-loading capability in a wide range of material.

**Material Application.** Work alone capability with a wide material appetite ranging from overburden to laminated rock. Conditions material which promotes compaction in the fill and significantly reduces dust during loading. **Auger Mechanism.** The auger lifts material off of the cutting edge and carries it to the top of the load for true self-loading capability. Material is distributed evenly throughout the bowl, resulting in consistent loads.

**Dual Horsepower.** Provides increased power to the auger for improved loading performance.

**Slip Limiter Switch.** Prevents rear wheel slip during loading.

**Apron.** Prevents material spillage and retains fine material far better than an elevating scraper.

### Serviceability

Simplified service means more productive uptime.

**Service Points.** Service points for the engine are grouped on the right-hand side for easy access.

**Floor Rollers.** Sealed floor rollers eliminate lubrication.

**Hydraulic Chain Adjuster.** Easily adjusted using a grease gun, reducing service time and improving overall chain life.

Wiring Harness. Incorporates colorcoded and numbered circuits for quick identification and simplified troubleshooting. **Cantilever Wheels.** Provide greater parts commonality and ease of serviceability to the wheels and brakes.

**Electronic Monitoring System (EMS II).** Monitors machine status and provides real-time information to the operator including warnings of problems identified by the Electronic Control Modules.

### **Convenient Diagnostic Connections.**

Allow quick trouble-shooting using the Electronic Technician (ET) service tool. Cat Electronic Technician software running on a laptop computer provides enhanced diagnostic capability for troubleshooting. Electronic Technician also provides cylinder cut-out tests and other testing capabilities.

# **Complete Customer Support**

Unmatched in the industry!

**Parts Availability.** Most Cat parts are immediately available from any dealer. Cat dealers rely on our worldwide computer network to find parts instantly and minimize machine downtime. Many components are economically available as Caterpillar Remanufactured Products.

**Machine Management Services.** Cat dealers help manage your equipment investment with:

• Effective preventive maintenance programs.

• Diagnostic programs such as Scheduled Oil Sampling (S•O•S) and Technical Analysis.

- Information to make the most costeffective repair option decisions.
- Customer meetings; training for operators and mechanics.

**Flexible Financing.** Your dealer can arrange affordable financing for the entire Caterpillar product line. Talk to your dealer to learn how terms can be structured to meet your cash flow requirements.

All Caterpillar engines are built to excel in even the most demanding jobs.

# 621G/623G/627G Tractor

Four-stroke cycle, 6 cylinder 3406E turbocharged and aftercooled diesel engine.

| Ratings at 1800 rpm* | kW hp |     |
|----------------------|-------|-----|
| Gross power          |       |     |
| Gears 1 and 2        | 267   | 358 |
| Gears 3-8            | 293   | 393 |
| Net power            |       |     |
| Gears 1 and 2        | 246   | 330 |
| Gears 3-8            | 272   | 365 |

The following ratings apply at 1800 rpm when tested under the specified standard conditions for the specified standard:

| Net power   | kW   | hp   | PS   |
|-------------|------|------|------|
| Caterpillar | 246/ | 330/ |      |
|             | 272  | 365  |      |
| ISO 9249    | 246/ | 330/ |      |
|             | 272  | 365  |      |
| EEC 80/1269 | 246/ | 330/ |      |
|             | 272  | 365  |      |
| SAE J1349   | 244/ | 327/ |      |
|             | 270  | 361  |      |
| DIN 70020   |      |      | 342/ |
|             |      |      | 378  |

### Dimensions

| Bore         | 137 mm      | 5.4 in    |
|--------------|-------------|-----------|
| Stroke       | 165 mm      | 6.5 in    |
| Displacement | 14.6 liters | 893 cu in |

### \*Power rating conditions

- based on standard air conditions of 25°C (77°F) and 99 kPa (29.32 in Hg) dry barometer
- used 35° API gravity fuel having an LHV of 42 780 kJ/kg (18,390 Btu/lb) when used at 30°C (86°F) [ref. a fuel density of 838.9 g/L (7.001 lb/U.S. gal)]
- net power advertised is the power available at the flywheel when the engine is equipped with fan, air cleaner, muffler and alternator
- no derating required up to 3350 m (11,000 ft) altitude

#### Features

- fuel system (3406E) delivers fuel economy through mechanically actuated, electronically controlled unit injectors
- electronic control provides precise speed governing, active and logged diagnostic codes, cold start-up mode, low oil pressure warning/derate and high temperature warning/derate
- direct-injection fuel system (3306 627G Scraper engine) with individual adjustment-free injection pumps and valves
- integral inlet manifold porting with two intake and two exhaust valves per cylinder with valve rotators or 3406E and one intake and one exhaust valve per cylinder on 3306
- cam-ground and tapered aluminumalloy pistons with three keystonedesigned rings; cooled by oil spray
- steel-backed, copper-bonded, aluminum bearings, through-hardened crankshaft journals
- pressure lubricated with full-flow filtered and cooled oil
- dry-type air cleaner with primary and secondary elements
- 24-volt direct-electric starting system;
   75-amp alternator with two 12-volt,
   172 amp-hour batteries
- standard ether starting aid

### 627G (Scraper only)

Four-stroke cycle, 6 cylinder 3306 DITA turbocharged diesel engine.

| Ratings at 2200 rpm* | kW  | hp  |
|----------------------|-----|-----|
| Gross power          | 185 | 246 |
| Net power            | 168 | 225 |

The following ratings apply at 2200 rpm when tested under the specified standard conditions for the specified standard:

| Net power   | kW  | hp  | PS  |
|-------------|-----|-----|-----|
| Caterpillar | 168 | 225 |     |
| ISO 9249    | 168 | 225 |     |
| EEC 80/1269 | 168 | 225 | _   |
| SAE J1349   | 166 | 223 |     |
| DIN 70020   |     |     | 233 |

#### Dimensions

| Bore         | 121 mm      | 4.75 in   |
|--------------|-------------|-----------|
| Stroke       | 152 mm      | 6.0 in    |
| Displacement | 10.5 liters | 638 cu in |

# **Transmission**

Eight-speed automatic power shift.

### 621G Maximum travel speeds

| (at normal s | hift points) | km/h | mph  |
|--------------|--------------|------|------|
| Forward      | 1            | 5.0  | 3.1  |
|              | 2            | 7.6  | 4.7  |
|              | 3            | 10.9 | 6.8  |
|              | 4            | 14.8 | 9.2  |
|              | 5            | 19.9 | 12.4 |
|              | 6            | 26.9 | 16.7 |
|              | 7            | 36.4 | 22.6 |
|              | 8            | 51.5 | 32.0 |
| Reverse      |              | 9.2  | 5.7  |

### 623G Maximum travel speeds

| (at normal s | hift points) | km/h | mph  |
|--------------|--------------|------|------|
| Forward      | 1            | 5.0  | 3.1  |
|              | 2            | 7.6  | 4.7  |
|              | 3            | 10.9 | 6.8  |
|              | 4            | 14.8 | 9.2  |
|              | 5            | 19.9 | 12.4 |
|              | 6            | 26.9 | 16.7 |
|              | 7            | 36.4 | 22.6 |
|              | 8            | 51.5 | 32.0 |
| Reverse      |              | 8.9  | 5.4  |

### 627G Maximum travel speeds

| (at normal s | hift points) | km/h | mph  |
|--------------|--------------|------|------|
| Forward      | 1            | 5.0  | 3.1  |
|              | 2            | 7.6  | 4.7  |
|              | 3            | 10.9 | 6.8  |
|              | 4            | 14.8 | 9.2  |
|              | 5            | 19.9 | 12.4 |
|              | 6            | 26.9 | 16.7 |
|              | 7            | 36.4 | 22.6 |
|              | 8            | 51.5 | 32.0 |
| Reverse      |              | 8.9  | 5.4  |

### **Tractor Features**

- single-lever shift control
- torque converter multiplies torque in first, second and reverse
- third through eighth gears are direct drive
- all shifts up or down from second to top gear selected are automatic
- push-button switch on the implement joystick holds transmission in any gear
- microprocessor monitors output shaft speed and can override control to shift up or down one gear to ensure proper engine rpm
- Mac 14 Transmission Control
- latching diagnostics, neutral coast inhibitor and top gear control
- Individual Clutch Modulation (ICM) for fast, smooth shifts and improved serviceability

### Scraper Features (627G only)

- planetary-type, full torque converter drive with four ranges
- shifting is synchronized to tractor transmission by Mac 14 controllers

### Steering

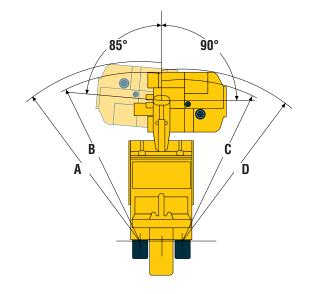

Full hydraulic power steering.

#### Ratings

| Width required for | or curb-to-curb |       |
|--------------------|-----------------|-------|
| 180° turn          | 10.9 m          | 35'9" |
| Steering angle:    |                 |       |
| right              |                 | 90°   |
| left               |                 | 85°   |

### Features

- two double-acting hydraulic cylinders
- hydraulic follow-up system for automotive feel
- optional supplemental steering system meets SAE J1511 (OCT90) and ISO 5010 (1992) requirements

|                         | 621G/627G |        | 623G    |        |
|-------------------------|-----------|--------|---------|--------|
| Maximum Clearance Radii |           |        |         |        |
| A                       | 9023 mm   | 29'7"  | 9343 mm | 30'8"  |
| D                       | 9083 mm   | 29'10" | 9402 mm | 30'10" |
| Turning Radii           |           |        |         |        |
| В                       | 8326 mm   | 27'4"  | 8654 mm | 28'5"  |
| С                       | 8255 mm   | 27'1"  | 8581 mm | 28'2"  |

### Cushion Hitch and Gooseneck (621G/627G)

Parallelogram-type linkage connects two-piece hitch.

### Features

- vertically mounted hydraulic cylinder transfers road shocks to nitrogen accumulators
- controlled oil flow dampens rebound oscillation
- leveling valve automatically centers piston in cylinder for all scraper loads
- cushion ride lock down control for positive cutting-edge down pressure when loading or spreading
- cushion hitch makes extensive use of steel castings, eliminating many welded joints and adding strength
- double-kingbolt design withstands high external forces, allows easy installation and removal
- box-section gooseneck reduces plate and weld stresses

### **Brakes**

Meet the following standards: OSHA, MSHA, ISO 3450: 1998.

### Service brake features

- air-applied, spring-released
- cam-operated, expanding-shoe type

### Parking brake features

- uses service brakes which are springapplied, air-released
- manually applied park brake switch can be applied with button on dash

### Secondary brake features

- uses single axle service brakes which are air-applied, spring-released
- automatically applied if service air pressure drops to 380 kPa (55 psi)
- audible and visual action alert indicators inform operator when service air pressure drops to 518 kPa (75 psi)

### Cab

Caterpillar cab and Rollover Protective Structure (ROPS) are standard in North America, Europe and Japan.

### Features

- meets OSHA and MSHA limits for operator sound exposure with doors and windows closed (according to ANSI/SAE J1166 MAY90)
- ROPS meets the following criteria: SAE J320a
   SAE J1040 MAY94
   ISO 3471-1986, ISO 3471-1994
- also meets the following criteria for Falling Objects Protective Structure: SAE J231 JAN81 ISO 3449-1992

### Note:

When properly installed and maintained, the cab offered by Caterpillar, when tested with doors and windows closed according to ANSI/SAE J1166 MAY90, meets OSHA and MSHA requirements for operator sound exposure limits in effect at time of manufacture. The operator sound pressure level is less than 81 dB(A) when measured per ISO 6394 or 86/662/EEC.

# **Differential Control**

Caterpillar differential lock.

### **Tractor Features**

- engaged by foot switch
- helps prevent drive wheels from spinning in poor underfoot conditions

# **Final Drives**

Planetary final drives and full-floating axles.

### Features

- double-row roller bearings are service-free
- protected with Duo-Cone Floating Ring Seals

### Tires

| Manufacturer | Tire Size            |
|--------------|----------------------|
| Michelin     | 33.25R29 MX XRB**E3  |
| Goodyear     | 33.25-29 HRL 32PR E3 |
| Michelin     | 29.5R29 MX XRB**E3   |
| Goodyear     | 29.5R29 RL2F4S* E2   |
| Goodyear     | 29.5-29 SGL 34PR E2  |
| Bridgestone/ |                      |
| Firestone    | 33.25R29 VRL**E3     |
| Goodyear     | 33.25R29 RT3A4S**E3  |

### Note:

In certain applications the scraper's productive capabilities might exceed the tires' tonnes-km/h (ton-mph) capabilities. Caterpillar recommends that you consult a tire supplier to evaluate all conditions before selecting optional tires.

# Elevator (623G only)

Infinitely variable, forward and reverse, to a loaded maximum of 82 m/min (268 fpm).

| Length (overall)     | 3730 mm | 12'3" |
|----------------------|---------|-------|
| Width of flight face | 217 mm  | 8.5"  |
| Length of flights    | 2260 mm | 7'5"  |
| Spacing of flights   | 510 mm  | 20"   |
| Number of flights    |         | 15    |

### Features

- single pivot linkage on elevator frame
- hydraulic chain adjuster
- hydraulically driven through 48.4:1 planetary gear reduction box
- split construction drive sprockets
- adjustable chain with heat-treated rollers, pins and links

# **Controls**

Single point joystick control.

- bowl raise, hold, lower and quick drop
- ejector dump, hold, return and electronic detented return
- elevator infinitely variable forward and reverse (623G only)
- apron raise, hold, lower and float (621G, 627G)

## **Standard Equipment**

Standard and optional equipment may vary. Consult your Caterpillar dealer for specifics.

### Electrical

Alarm, back up Alternator, (tractor engine) 75-amp Alternator, (scraper engine) 35-amp Batteries, four 12-volt, maintenance free, high output Electrical system, 24-volt Lighting system: Floodlight, cutting edge Hazard lights Headlights, halogen with dimmer Stop/tail lights Turn signals Starting receptacle, (tractor and scraper engines)

### **Operator Environment**

Air conditioner (includes heater and defroster) Cigarette lighter and ashtray Coat hook Dome courtesy light Diagnostic connection port (12-volt) Gauges/Indicators: Air pressure Converter/retarder temperature Electronic Monitoring System (EMS II) Engine coolant temperature Fuel Speedometer Tachometer Transmission gear indicator

Horn, electric Implement control joystick Mirrors, rearview Radio ready (two radio openings, speakers, 5-amp converter) ROPS cab, sound suppressed, pressurized Seat belt Seat, air suspension, Cat comfort cloth Storage compartment Steering wheel, tilt, telescoping and padded Throttle lock Transmission hold Windows, sliding side Windshield, laminated glass, swingout Windshield wiper/washer, front and rear

### **Power train**

Engine: 3406E EUI Diesel Engine — Tractor 3306 DITA Diesel Engine — 627G Scraper Air cleaner with pre-cleaner Ground level engine shutdown Guard, crankcase Muffler Starting aid, ether (automatic) Thermo-shield, laminated Braking system: Parking/primary/secondary Shields, brake Transmission: 8-speed, automatic power shift with electronic control Control throttle shifting Differential, lock-up Downshift inhibitor Neutral coast inhibitor Programmable top gear selection

### **Other Standard Equipment**

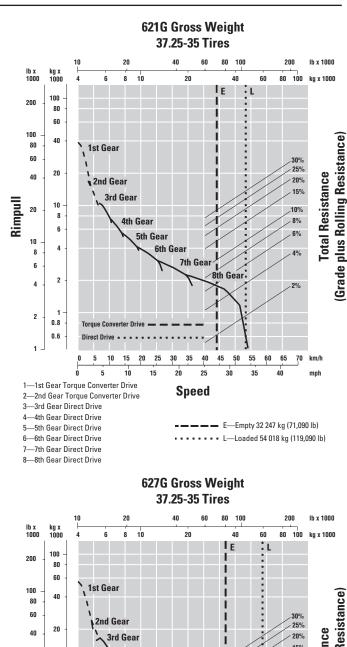

Air dryer (tractor) Advanced Modular Cooling System (AMOCS) radiator Cushion hitch Fast oil change system Fenders (tractor) Locks, vandalism protection Rims, 737 mm (29") Tires, 33.25-R29 MX XRB E3 Tow pins, front and rear

### Gradeability/Speed/Rimpull

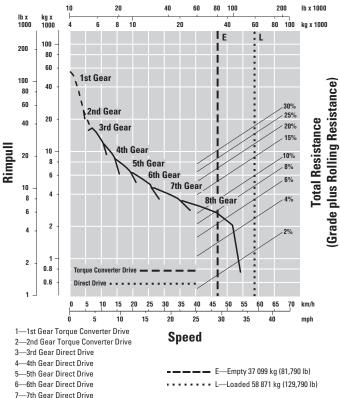

To determine gradeability performance: Read from gross weight down to the percent of total resistance. Total resistance equals actual percent grade plus 1% for each 9 kg/t (20 lb/ton) of rolling resistance. From this weightresistance point, read horizontally to the curve with the highest obtainable gear, then down to maximum speed. Usable rimpull will depend upon traction available and weight on drive wheels.

# Retarding

To determine retarding performance: Read from gross weight down to the percent effective grade. (Effective grade equals actual percent grade minus 1% for each 9 kg/t (20 lb/ton) of rolling resistance). From this weight-effective grade point, read horizontally to the curve with the highest obtainable speed range, then down to maximum descent speed the retarder can properly handle.
