

Cat[®] CP44B

Padfoot Drum Vibratory Soil Compactor

FEATURES:

The Cat® CP44B features a padfoot drum and is ideally suited for cohesive and semi-cohesive soil applications:

- Comfortable and ergonomic operator station features pivoting seat with integrated multifunction LCD display and control console, outstanding visibility to the front and rear of machine, low sound and vibration levels for greater operator comfort and productivity.
- World-class propel system built around the exclusive Cat dual pump propel system, two pumps provide separate dedicated flow to drum drive motor and rear axle motor for exceptional gradeability and traction in forward and reverse.
- Virtually maintenance free due to maintenance-free hitch bearings and extended maintenance intervals for vibratory system and hydraulic system, providing more uptime and lower maintenance costs.
- Powerful Cat C3.4B engine meets US EPA Tier 4 Final and EU Stage IV emission standards.
- Involuted Oval Padfoot Design provides deeper compaction than square faced pad designs. Square pad design also available.
- Compact, highly manueverable and transportable.
