RAIL ROAD LOADERS

Safety devices:

- Rated lifting capacity indicator
- Dead man switch
- 3 emergency buttons
- Manual recovery pump
- 2 cameras for the rear and blind view with microphone
- Hydraulic and electro-hydraulic boom height limit
- Electro-hydraulic and mechanic turret swing limit
- FOPS certified cab (option one man cab)
- 12 V electric recovery pump (optional)

COLMAR rail road loaders and excavators are the best option for all type of track maintenance.

COLMAR Rail road loaders are powerful, reliable, safe and very easy to use.

They help increase productivity and reduce costs. With a huge variety of accessories, they are suitable to all work challenges that may arise in the site.

COLMAR quick connector attachments can be changed in less than two minutes and be ready for the next job.
