OTHER

Equipment and weight:

Weights (line 2.1) are based on the following specifications:

H8.00-12.00XM-6 - Complete truck with open operator module with 5400 mm 2-stage lfl mast, 2350 mm standard carriage and 1220 mm forks.

(Note: Truck weight with fully equipped cab instead of open operator module adds 400 kg to the total weight of the truck. 50 kg should be added to the rear axle loadings and 350 kg to the front axle loadings.)

Forks:

H8.00XM-6, H9.00XM-6:

65 x 200 x 1 220 mm long

H10.00XM-6, H12.00XM-6:

75 x 200 x 1 220 mm long

H13.00XM-16.00XM-6

OTHER

Equipment and weight:

Weights (line 2.1) are based on the following specifications:

H13.00-16.00XM-6 - complete truck with open operator module with 5400 mm 2-stage lfl mast, 2500 mm standard carriage and 1370 mm forks.

(Note: Truck weight with fully equipped cab instead of open operator module adds 400 kg to the total weight of the truck. 50 kg should be added to the rear axle loadings and 350 kg to the front axle loadings.)

Forks:

H13.00XM-6, H14.00XM-6, H16.00XM-6:
90 x 200 x 1 370 mm long

Rated capacities

Load centre

Distance from front of forks to centre of gravity of load.

Rated load

Based on vertical mast.

NOTE:

Specifications are affected by the condition of the vehicle and how it is equipped, as well as the nature and condition of the operating area. If these specifications are critical, the proposed application should be discussed with your dealer.

- ¶ Bottom of forks
- " Without load backrest
- ‡ Stacking aisle width (line 4.33) is based on the V.D.I. standard calculation as shown on illustration. The British Industrial Truck Association recommends the addition of 100 mm to the total clearance (dimension a) for extra operating margin at the rear of truck.
- † Gradeability figures (lines 5.7 & 5.8) are provided for comparison of tractive performance, but are not intended to endorse the operation of vehicle on the stated inclines. Follow instructions in the operating manual regarding operation on inclines.
- fl Noise level based on the weighting values contained in EN12053
- u Optional equipment
- ▶ Truck > 10 tonne capacity equipped with EC noise package. Noise level measured according to 2000/14/EC directive
- ▣ Data available on request, as values are dependant on application

Mast tables:

- ★ Add 25 mm if optional 10.00 x 20 tyres are fitted
- v Deduct 20 mm for H13.00XM-6 with 11.00 x 20 tyres

Notice

Care must be exercised when handling elevated loads. When the carriage and/or load is elevated, truck stability is reduced. It is important that mast tilt in either direction be kept to a minimum when loads are elevated. Operators must be trained and adhere to the instructions contained in the Operating Manual.

Hyster products are subject to change without notice.

Lift trucks illustrated may feature optional equipment.

This truck conforms to the current EU requirements.

Built with Experience and the Latest Technology

The latest generation of the Hyster H8.00-16.00XM-6 Range of Heavy Duty Forklifts is a market leader, building on the unique experience and success Hyster has had of providing application focused solutions to customers in a wide range of heavy industries for over 50 years.

This latest model is the 7th generation machine, and applies this experience, together with the latest advancements in technology, to create a range of forklift trucks designed to achieve maximum productivity, through industry leading dependability, serviceability and ergonomics, thanks to:

- › Nominal lifting capacities including side shift carriage
- › Full capacity up to 6200mm lift height
- › Fastest lifting, with a practical average of up to 0.55 m /sec
- › Excellent ergonomics with renowned Hyster Vista Cab
- › Rugged construction of mast, frame and drive train
- › Automatic transmission shifting as standard, with the APC200 soft-shift system featuring protective lock-out on forward-reverse shifting
- › Engine and transmission protection systems as standard
- › O-Ring Face Seal fittings used to eliminate hydraulic leaks
- › Easy serviceability, with centralised, PC accessible diagnostics, superior, unobstructed access to key components thanks to the tilting cab and gull-wing hood
- › Oil-immersed brakes contribute to increased productivity and reduced ownership costs

Power & Performance

The H8.00-16.00XM-6 range is available with either a Cummins Diesel or LPG engine. The Diesel engine meets the stringent Tier 3 NRMM emissions legislation:

Diesel Engine

The Cummins QSB 6.7 diesel engine features:

- › 6-cylinder in-line industrial engine, with 6.7 litre capacity and charge-air cooling and waste gate turbocharger
- › Max **116 kW** (156 Hp) output at only 2500rpm, offering extra durability for long periods of peak power operation.

Smooth torque of **597 Nm** at 1500 rpm provides excellent acceleration and lugging power

- › Engine protection system, acting on low oil pressure and high coolant temperature. The system initially derates the engine power and finally shuts down the engine. Includes an override function for emergency situations

LPG Engine

The Cummins 6B-LPG-Plus LPG engine features:

- › 6-cylinder, turbocharged industrial engine, with 5.9 litre capacity

- › An industrial rating with plenty of power: Max **116 kW** (156 Hp) output at only 2500rpm, offering extra durability for long periods of peak power operation

Smooth torque of **515 Nm** at 1 500 rpm provides excellent acceleration and lugging power

- › Air-to-LPG-fuel regulation by the Cummins INTERACT™ system provides excellent performance with low emission levels
- › Engine protection system, acting on low oil pressure and high coolant temperature. The system initially derates the engine power and finally shuts down the engine. Includes an override function for emergency situations

Driveline

Autoshift Transmission

Both powertrains are mated to the S.O.H. (Spicer Off-Highway) TE10 3-speed autoshift transmission and the AxleTech PRC-425 (H8.00-12.00XM-6) or PRC- 775 (H13.00-16.00XM-6) drive axle.

The S.O.H. transmission is fitted with the industry leading APC200 automatic gear-change system. This 3 speed auto-shift system features:

- › Smooth inching characteristic for precise load handling while stacking
- › A column-mounted lever or a Monotrol Pedal for direction changes
- › A 'soft-shift' characteristic (through electronic 'throttle-back' function during gear change). In addition to providing improved driver comfort, the system also eliminates shifting-shocks on the driveline
- › An 'on the move' forward-reverse shifting lock-out function, which protects the transmission and drive-line against overloading, during abrupt direction changes
- › The transmission incorporates adjustable parameters for engine and travel speed, as well as featuring extremely smooth shifting and torque controlled inching for the best overall truck performance
- › Transmission protection system, acting on high oil temperature (warning light, buzzer and initial derate, followed by shut down)

Drive Axle

The wide AxleTech drive axle offers:

- › Excellent sideways stability
- › Long-term durability thanks to the fitment of strong end-reduction shafts and gears
- › Multiple oil-immersed brakes on the drive axle feature oil cooling for durability and are virtually maintenance free. (For some applications dry brakes are available)
- › Parking brake: Dry disc brake on the drive axle input shaft, spring applied and hydraulically released

Steer Axle

The Hyster designed hydrostatic steer axle features

- › Double-acting, single steering cylinder with adjustable end stops. It is renowned for its long lifespan and low maintenance requirements
- › Load-sensing power steering to ensure low-effort operation under all operating conditions

Class Leading Ergonomics

The H8.00-16.00XM-6 series features the Hyster “Vista” cab, now common across the Hyster Big Truck range.

- › The cab has been designed to offer an industry-leading ergonomic operator environment, and focuses on maximising driver comfort and visibility for maximum levels of productivity during the operating cycle
- › Access is easy, thanks to wide opening doors with low mounted running boards
- › Optional air-conditioning is integrated into the heating and ventilation system, with manual temperature control. Sunshade screens are fitted on the top and rear windows
- › The fully adjustable armrest adjusts with the seat height for minimized arm movement resulting in maximum driver comfort and reduced driver fatigue
- › The armrest houses the integrated controls for lift/tilt/sideshift and auxiliary functions. The controls are low effort to ensure smooth and effortless use of the joystick or lever controls
- › The truck features a fully adjustable full-suspension driver's seat with seat belt, “park brake off” warning buzzer and operator presence system
- › The fully adjustable steering column features load-sensing, power-assisted steering
- › The cab also features conveniently positioned lever controls and instruments and a push-button parking brake
- › Responsive, fully hydraulic brakes and an automotive style pedal layout further contribute to driver confidence and comfort
- › The Hyster Vista Cab is equipped with a side mounted dash display - 4 bright LED warning lights mounted on the steering column inform the driver when he needs to refer to the dash display, ensuring that his/her attention is never unnecessarily diverted from the job in hand
- › The multi-function CAN-bus controlled display panel consists of a comprehensive array of gauges and backlit warning lights, including an LCD screen and error code facility
- › The spacious uncluttered floor covered with a high density rubber mat contributes to a low noise level of 73 dB(A) at driver's ear
- › The Hyster Vista cab is mounted on elastometric rubber mounts isolating and minimizing the effects of road-born shocks and vibrations

Superior visibility

The Vista Cab also contributes to providing the driver with excellent all-round visibility, featuring:

- › Large curved front window, fitted with tinted safety glass
 - › Curved rear window with one-piece glass
 - › Minimum use of steel parts, providing the maximum possible glazed area
 - › Upward visibility is virtually free from obstruction, thanks to a clever overhead guard design: The overhead bars curve outwards to create a panoramic upward view
 - › Wide-view rear view mirrors are fitted inside the cab
 - › The dash display is mounted to the right hand side of the driver, so visibility through the windscreen is unobstructed
- › Front, rear and top wipers, washers and demisters, a fresh air inlet, sliding windows, an effective heater and defroster all combine to ensure that the driver has a clear view in all weather conditions
 - › Excellent rearwards visibility is enhanced thanks to the sloping design of the hood and counterweight
 - › A clear view to the front is optimized by using the Hyster Vista mast with:
 - Wide mast construction
 - Rear-mounted lift cylinders (behind the mast channels), for minimum obstruction

Rugged Front-End Construction Matches Application Requirements

All Hyster H8.00-16.00XM-6 forklift trucks are equipped with heavy duty Vista masts to handle all types of load.

- › 3 different mast strengths, appropriate to the truck capacity, ensures the right mast for the job
- › Designed with the modern FEM (Finite Element Modelling) system
- › Equipped with rollers and side bearing blocks for excellent lateral rigidity
- › Generous overlap of the mast channels for maximum durability
- › Same mast channels are used for masts up to 7 metres, providing a tough mast for all lift heights
- › Proven design, with thousands of trucks built and operating today
- › Deliverable as two or three stage versions

The Hyster pin-type carriage is an integral piece of the rugged front-end construction. Its design benefits from Hyster's long experience, to ensure maximum performance combined with excellent visibility.

- › A wide range of carriages is available to suit all applications including non-sideshift, sideshift and individual or simultaneous fork-positioning
- › The sideshift carriage is equipped with top bronze bearings and bottom sliding blocks for minimum wear
- › The electro hydraulically controlled valves are mounted directly on the carriage and are supplied with only two hydraulic hoses and one electric harness

Fast Machine for Maximum Productivity

To achieve maximum productivity, Hyster has equipped the H8.00-16.00XM-6 series with high performance hydraulics and a powerful powertrain.

The hydraulic system is highly efficient, and features 'Power on Demand' and 'Two-Speed Lift' functions.

- › The result is lifting speeds that are class leading: The practical 4-mode average lifting speed with a Diesel engine is a fantastic 0.39 m/sec to 0.55 m/sec. #)

#) Average of four lifting modes:

Unladen lift speed = 0.39 to 0.74 m/sec

Laden lift speed = 0.25 to 0.46 m/sec

Unladen lowering speed = 0.43 to 0.49 m/sec

Laden lowering speed = 0.49 to 0.55 m/sec

Laden travel speeds from 25.2 km/h up to 29.7km/h are possible - If these travel speeds are too high for the application, your Hyster dealer can adjust the speeds to your suit requirements.

Strength & Stability

Excellent stability boosts operator confidence and truck versatility, making the H8.00-16.00XM-6 series suitable for the harshest applications:

- › All nominal capacities are rated to include the sideshift carriage. This means that a Hyster with a standard non-sideshift carriage has an extra capacity from 400 kg to 1000 kg
- › The H8.00-16.00XM-6 series has been designed to handle loads to high lift heights. There is no reduced capacity up to and including 6200 mm. Even above 6200 mm lift height the de-rating has been kept to a minimum

- › Due to the short load distance (“x” measurement as per VDI table) and high residual rear axle loading on the Hyster steer axle, these Hyster trucks have excellent stability

A Solid Framework

The unitised box frame used in the H8.00-16.00XM-6 series is designed for maximum strength with:

- › 3 different wheelbases, ensuring the narrowest possible turning radius for each truck
- › FEM (Finite Element Modelling) to ensure durability.
- › All frames are based on the largest model - H16.00XM-6

Ease of Serviceability

The Hyster H8.00-16.00XM-6 series is renowned for its ease of maintenance. The truck is easy accessible with unobstructed access to the engine compartment and conveniently located service check points:

- › Equipped as standard with either a manual or electric tilting cab, to ensure easy access to major components for service
- › Gas-spring assisted gull wing hoods for convenient access to engine compartment, reducing downtime
- › Low running boards, providing mechanics an excellent vantage point to work from
- › Window washer refill bottle located next to cab for quick, easy access
- › Clean electrical and hydraulic routings
- › Centralised diagnostics in the operator cab
- › 'CANbus' connections in the operator cab, for engine, transmission, hydraulics and instruments cluster
- › LCD display with diagnostics for engine, transmission and electrical systems to quickly identify service needs
- › Standard oil-immersed (wet) brakes are virtually maintenance free
- › 500 hour service interval

Other Features

Hydraulics

Hyster two-speed system with regenerative function results in high lift speeds, in combination with a Hyster designed 2 stage mast

- › Leak-free ORFS (O-ring) type fittings are used throughout the whole machine
- › The hydraulic oil tank is equipped with an external sight glass for oil level
- › Filtration: Full-flow return line filter with 10 micron cartridge on the main system

Electrics

- › 24 Volt system, 70 A alternator
- › 'CANbus' connection in the operator cab, for engine, transmission, hydraulics and instruments cluster
- › LCD display with diagnostics for engine, transmission and electrical systems to quickly identify service needs

Cooling

The H8.00-16.00XM-6 is designed to operate in ambient temperatures of -18° C up to 50° C in normal applications, or up to 45° C for heavy duty operations.

Generously sized aluminium radiator block consists of four (individually exchangeable) sections:

1. Charge air cooler
2. Engine coolant
3. Brake and hydraulic oil
4. Transmission oil

- › The air-intake is now located at the top of the counterweight, to provide a cleaner air-flow

Lights

2 mast mounted work lights, 2 rear cab-mounted work lights, 2 front marker lights, LED direction indicators stop, tail and reverse lights.

Optional Equipment

- › Engine block heater
- › Powered tilting cab for more convenient service access
- › Lifting eyes (2 x on mast and 2 x on rear counterweight)
- › Radial pneumatic tyres
- › Solid (pneumatic shaped) tyres
- › Air conditioning
- › Open driver module
- › High backrest on seat
- › Air suspended seat
- › Trainer seat
- › Monotrol drive control
- › Joystick hydraulic control
- › 24/12 volt DC-DC converter
- › Various light kits
- › Application specific masts (2-Stage Limited Free Lift, 2-Stage Full Free Lift, 3-Stage Full Free Lift), carriages and forks
- › Hydraulic accumulator
- › Back-up alarm (self-adjustable to 5 dB above ambient)
- › Special RAL colours
- › Dry drum brakes instead of oil-immersed brakes
- › Reading light in the cab
- › Sun shade: sliding screen under top window of cab
- › Extra air re-circulation fan, inside the cab
- › Various attachments: Coil ram, paper roll clamp, etc
- › Raised cab position 500 mm

Strong Partners, Tough Trucks, for Demanding Operations, Everywhere.

Hyster supplies a complete range of warehouse equipment, IC and electric counterbalanced trucks, container handlers and reach stackers.

Hyster is committed to being much more than a lift truck supplier. Our aim is to offer a complete partnership capable of responding to the full spectrum of materials handling issues:

Whether you need professional consultancy on your fleet management, fully qualified service support, or reliable parts supply, you can depend on Hyster.

Our network of highly trained dealers provides expert, responsive local support. They can offer cost-effective finance packages and introduce effectively managed maintenance programmes to ensure that you get the best possible value. Our business is dealing with your materials handling needs so you can focus on the success of your business today and in the future.

Hyster Europe, Flagship House, Reading Road North, Fleet, Hants GU51 4WD, England.
