E-SERIES SKID STEER LOADERS 318E/320E/326E/328E/332E

JOHN DEERE

Your words carry a lot of weight, too.

When our customers express their opinions, we listen. And you'll discover plenty of bright ideas in our E-Series Skid Steers that are the result of your input. Such as courtesy lighting for illuminated cab entrance/exit in dark environments. Larger-displacement slower-running diesels for easier cold-weather starting and improved fuel efficiency. Significantly more power in the top-ofthe-line 332E. Increased performance in the 328E. Best-in-class visibility and bucket breakout forces in all five models. And increased operating capacities in the 318E, 320E, and 326E. You have more control choices, too, including exclusive switchable electrohydraulic (EH) H-ISO-foot controls. And quieter, more spacious operator stations. Other customer-inspired enhancements include a redesigned rear hood and easier-to-remove/replace heavier-duty engine side shields that simplify servicing. You won't find a more owner- and operator-friendly skid steer on the market. You have our word on it.

		and the state of the			The same	
	Specifications	318E	320E	326E	328E	332E
1	Power	47.1 kW (63 gross hp) / 44.8 kW (60 net hp)	51.7 kW (69 gross hp) / 49.4 kW (66 net hp)	54.8 kW (74 gross hp) / 52.5 kW (70 net hp)	64.0 kW (86 gross hp) / 62.0 kW (83 net hp)	74.6 kW (100 gross hp) / 72.0 kW (97 net hp)
4	Rated Operating Capacity	885 kg (1,950 lb.)	994 kg (2,190 lb.)	1221 kg (2,690 lb.)	1271 kg (2,800 lb.)	1453 kg (3,200 lb.)
	Breakout Force

	Bucket	2724 kg (6,000 lb.)	2724 kg (6,000 lb.)	3519 kg (7,750 lb.)	4676 kg (10,300 lb.)	6299 kg (13,875 lb.)
	Tipping Load	1771 kg (3,900 lb.)	1989 kg (4,380 lb.)	2443 kg (5,380 lb.)	2542 kg (5,600 lb.)	2906 kg (6,400 lb.)

3

 Although not exactly a sunroof, the bolton top window on cab-equipped models removes quickly for increased ventilation and/or easy cleaning.

4

2. Standard courtesy lighting stays on up to 90 seconds after the engine is shut down, illuminating the way for easier exits out of dark barns or off after-hour jobsites.

Open the door to a more productive day.

When was the first time that "compact" and "comfortable" were accurately used together to describe a skid steer? But with the many refinements found in our E-Series, we can make the claim with a straight face. Wideopen entryways and flat floors allow easier in and out, and provide more foot- and legroom. Operators will also like what they see from the sculpted suspension seat. All-around visibility is expansive and second-to-none. The highly efficient HVAC system employs eight automotive-style vents to keep the glass clear and cab comfortable. Plus plenty of other cab amenities including an optional AM/FM weather-band radio with dual speakers help tune-in more productivity.

Triple-interlock operator-presence system automatically applies the brakes when the lap bar is raised, the operator leaves the seat, or the engine is shut down.

Expansive curved front glass, large top window, and low side windows make it easy to see the surrounding jobsite. Even with an expanded engine compartment, best-in-class sightlines provide a clear view of the action behind you, as well.

Flat floors in the 326E, 328E, and 332E provide 33-percent-more comfort-lending foot room. Make getting in and out of the cab easier, too.

Fully adjustable pull-down padded lap bar provides comfortable arm support.

HVAC system employs eight automotivestyle louvers to direct warm or cold airflow where it's appreciated most — on the operator. For production-boosting yearround comfort.

Cabs and floors are tightly sealed and pressurized to keep out dust and noise.

We've got your back with a sculpted airride or mechanical-suspension seat to help smooth the ride. Choose either a cloth or vinyl air-suspension seat in cab-equipped models.

Storage box, cup holder, and iPod[™]/ cell-phone holder (with nearby 12-volt power port) provide plenty of room to stow your stuff.

Set your sites on getting more done.

Want a skid steer that's more productive? Get one of ours. Optimal weight distribution, low center of gravity, high ground clearance, and long wheelbase deliver superior stability. But getting there is only half the battle. These skid steers also excel at putting material in its place. Their patented vertical-lift boom rises to the occasion, delivering exceptional lift height and reach. So you can do more, with less effort.

350E

- Superior axle torque and impressive bucket breakout deliver the leverage and traction to dig in where others just spin. For best-in-class pushing, prying, and digging power.
- Optional ride control's shock-absorbing boom cylinders cushion bumps, helping retain full bucket loads all the way to your destination. Help speed navigation over rough terrain, too.
- **3.** Impressive tipping load and rated operating capacities empower our E-Series Skid Steers to master an ever-changing variety of material-handling tasks.
- 4. Some jobs can be a real stretch. Our patented boom design clears high sideboards and even dumps to the center of tandem-axle trucks.

E-Series' unequalled ability comes from a design that optimizes hydraulics, lift capabilities, and pushing forces.

Fully electronic injection systems aid cold-weather starting and enable E-Series engines to run at lower rpm without sacrificing power. For longer life and better fuel efficiency.

Fast ground speeds and large bucket capacities enable these nimble material movers to make the most of every cycle. Need even more speed? Opt for a twospeed transmission.

Become a "controls freak."

We'll excuse you for becoming a bit of a "controls freak" after running one of our skid steers. Offering one-of-a-kind options, only the E-Series lets an operator decide how the work gets done. ISO, H-pattern, or foot/joystick electrohydraulic (EH) controls are all available. Or, choose our exclusive switchable EH option that lets you select any of the above, at any time, at the push of a button. That's just for starters. Add the EH Joystick Performance Package, and you can customize vehicle and attachment response. The ultimate people pleasers, our E-Series truly is all things to all operators.

- Overhead panel conveniently places machine info on the left, control switches to the right. Easy-to-read LCD monitor accesses a wealth of machine info and control — including vital operating conditions and advanced diagnostics.
- Joystick buttons, rotary switch, and triggers actuate and control the auxiliary hydraulics/flow rates, boom float, and two-speed transmission.
- **3.** Optional keyless-start sealed-switch panel includes an anti-theft system with one owner and five individual codes. And simple fingertip control of numerous options.

EH joysticks are standard on the 328E and 332E; optional on the 318E, 320E, and 326E. They're our smoothest and most responsive yet, providing enhanced control and operating ease.

Now you can have your joysticks and foot pedals, too. Exclusive switchable EH controls allow the operator to choose ISO, H-pattern, or EH joystick and foot controls. Simply press a button on the keyless sealed-switch module (SSM).

Want to make the most of our vertical-lift boom design? Add the self-level option and simplify your material-handling tasks.

EH Joystick Performance Package lets an operator customize operation and response to personal preferences through the SSM:

- Attachment control operates hydraulic-powered additions such as augers or breakers.
- Creeper control allows slow incremental travel speeds while maintaining full engine and hydraulic power. It's ideal for work with cold planers or trenchers.
- Boom and bucket speed settings enable precision (slow), utility (normal), and productivity (fast) responses.
- Switchable controls let you choose ISO or H-pattern.
- Propel aggressiveness modes set travel/steering response rates.
 Precision is ideal for work in tight spaces. Utility is for normal operation. Production delivers faster response for stockpiling and truck loading.

Work our connections, as you expand yours.

If you're looking to broaden your business, your John Deere dealership is the place to start. Their equipment offering includes more than 100 Worksite Pro[™] attachments that will help expand your efforts. E-Series Skid Steers are designed with these additions in mind. The universal Quik-Tatch[™] makes attachment switchover quick and easy. Standard-flow auxiliary hydraulics with connect-under-pressure couplers is also standard. And if your equipment yard includes our compact track loaders, compact excavators, or compact loaders, many of these attachments are interchangeable between machines. Talk to your dealer to learn more.

Numerous rock, multipurpose, construction, utility, and tooth buckets are available in varying widths and capacities.

Clear heavy brush and saplings with our rotary cutters. Or put a mulching head to work shredding trees and stumps.

High- or standard-flow trenchers and removable backhoes work well for irrigation and underground utility tasks.

Cleanup is quicker with tools such as our brush, scrap, and utility grapples. Two hydraulic-actuated dual-action tongs provide superior material retention.

Worksite Pro attachments:

Aa forks Augers Backhoes Bale spears (round, square) Blades (snow, utility) Breakers/hammers Brooms (angle, pickup) Cold planers Dozer blades Grapples (ag utility, brushtined, scrap) Landplanes Mulching heads Multipurpose buckets Pallet forks Power rakes Rock buckets Roller levels **Rotary cutters Rotary tillers** Scrapers (material, manure) Side-discharge buckets Snow blowers Snow pushers Trenchers Vibratory rollers

- 1. Our skid steers are also your foulweather friends. Equipped with snow blower, snow pusher, blade, or angle broom, they make quick work of cleaning up whatever drops your way.
- 2. Bust through with any of our four breakers. Their low-pressure nitrogencharged design cushions both machine and operator.
- **3.** Perfect for concrete or asphalt flatwork — our angle brooms, rollers, cold planers, and wide variety of buckets let you hit the road running.
- 4. Our offering of landscape and nursery tools continues to grow and includes rotary tillers, augers, pallet forks, power rakes, landplanes, dozer blades, and roller levels, to list just a few.
- 5. For handling feed, cleaning out pens, re-bedding stalls, or numerous other chores — we've got the utility grapples, manure scrapers, forks, bale spears, and buckets to get it done.

Courtesy of Machine.Market

Nothing runs like a Deere, because nothing is built like one.

Downtime and deadlines don't mix — which is why we build our skid steers the way we do. Large-displacement electronic-injection diesels headline the list of uptime-boosting enhancements. Other job-proven durability difference-makers include our exclusive V-plenum cooling system with hydraulically driven variable-speed fans. Heavy-duty axles. Beefy booms and upper links. And integrated rear bumpers. When you know how they're built, you'll run a Deere.

Large cross-section boom arms and heavy-duty upper links deliver the strength to endure tough tasks for long-term durability.

The E-Series employs the same job-proven EPA Interim Tier 4 (IT4)/ EU Stage IIIB and Final Tier 4 (FT4)/ Stage IV technologies as our larger equipment. Simple, fully integrated, and fully supported, our emission solution delivers industry-leading fuel efficiency and uptime.

Diesel particulate filter (DPF) cleaning doesn't impact or interrupt machine performance under normal operating conditions.

Switches and electrical connectors are sealed from moisture and dirt to help prevent corrosion.

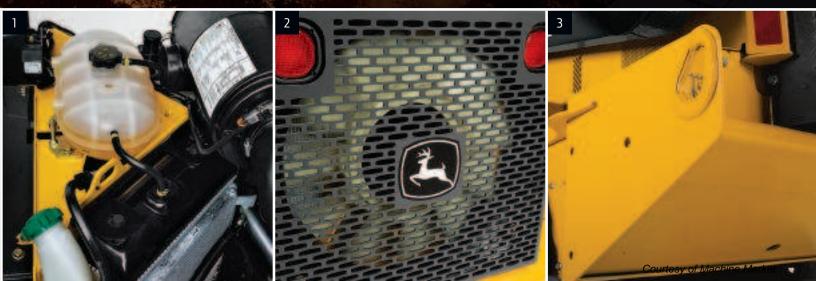

Spring-applied, hydraulic-released wet-disc park brakes are fully enclosed and never require adjustment. O-ring face-seal hydraulic fittings virtually eliminate aggravating and costly oil leaks.

Auto-idle helps preserve engine life and conserve fuel, reducing engine speed after the operator has vacated the seat. Full auto-idle (available with EH controls) slows the engine after five seconds of inactivity and resumes preset engine speed with any joystick movement.

Auto-shutdown system monitors engine and hydraulic vitals, and issues an audible warning when limits are exceeded. If necessary, it shuts down the machine to help prevent damage.

318E/320E's auxiliary hydraulic lines are routed through the boom arms for an extra degree of protection. Couplers connect under pressure for quick and easy powered-attachment hookup. 320E DEEF

- Industry-exclusive design separates coolers in an innovative V-shape configuration that's 10-percent-more efficient. Large aluminum hydraulic cooler and radiator provide the necessary capacity for high-ambient-temperature operation.
- Hydraulic-driven variable-speed fan runs only as fast or frequently as needed — for improved power and fuel efficiency, and decreased noise and debris flow through the coolers. Exclusive reversible option can be set to automatically reverse as often as the application dictates to clear core-clogging buildup.
- **3.** Rear bumper with integral tie-downs protects cooling components from run-ins with obstacles. Add the optional heavy-duty rear grille for even more durability.

Maintenance made "E"asy.

Servicing an E-Series Skid Steer is quick and easy. So easy, in fact, that you won't even have to raise its boom for daily service or most periodic maintenance. Checkpoints are conveniently grouped and easily reached beneath the hinged hood. And removable side panels give way to the coolers, maintenance-free battery, and fluid and air filters. If necessary, the operator station tilts in minutes for best-in-class drivetrain access. And industry-leading parts and service are just as accessible at more than 1,300 John Deere dealer locations from coast to coast.

chine.Market

Daily servicing is quick and convenient. Simply lift the gas-shock-supported hood for ground-level access to check fluids and refuel.

Removable rear side panels allow wideopen service access and are easier to remove and replace. Stronger, too.

Through-the-monitor onboard diagnostics help speed troubleshooting.

These skid steers share components such as engines with our CTLs and compact excavators, making it easier to ensure you always have the right filters and fluids on hand.

Fluid-fill and service checkpoints are grouped and color-coded. And a conveniently displayed maintenance chart helps ensure that nothing gets overlooked.

Diesel particulate filter (DPF) service interval is 3,000 hours, and can be done by your John Deere dealer. V-plenum cooling-system design resists debris buildup and makes radiator and cooler cores easier to clean.

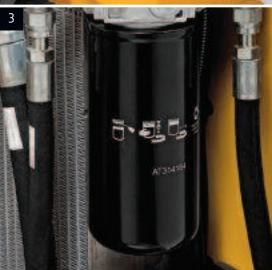

Because no maintenance beats low maintenance, engine serpentine belts never need adjustment.

Compare the cost of parts and labor for recommended maintenance with other makes. The E-Series will save you significant money.

- 1. Getting to the heart of a Deere is easy. There's no need to raise the boom just pivot the cab and remove the floor. Takes only minutes.
- Need extra elbowroom? Raise the boom and remove the side shields for wideopen engine-compartment access. Unique lock lever secures the boom from inside the cab.
- **3.** Spin-on filters and environmental drains allow quick fluid changes.
- **4.** Hydraulic sight gauge and see-through coolant and windshield washer fluid reservoirs let you check levels at a glance.

Plus-50 oil and John Deere oil filter are used. **Standard equipped with one [1] set.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. Gross power is without cooling fan. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with standard equipment, full fuel tanks, and 79-kg (175-lb.) operator
