FINAL DRIVES	large heavy-duty final drive assemblies attach directly to the transverse case and are isolated from the track frame to keep final drives from being adversely affected by shock loads; 450G is single reduction, 550G and 650G are double		
STEERING/BRAKES	oil-cooled and modulated steering system; multiple wet-disk steering clutches and wet-band steering brakes are pressure lubricated and located at the rear of the machine for easy servicing		
AUTOMATIC PARK BRAKE	exclusive safety feature engages whenever the engine stops, preventing machine operation, which eliminates brake damage

*See your John Deere dealer for further information.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. No derating is required up to 5,000 ft. (1500 m) altitude for the 450G and up to 10,000 ft. (3050 m) altitude for the 550G and 650G. Gross power is without cooling fan.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on units with rollover protective structures, full fuel tanks, 175-lb. (79 kg) operators, and standard equipment; 450G unit with 97-in. (2464 mm) PAT Blade for standard gauge or 121-in. (3073 mm) PAT Blade for wide gauge; and 550G and 650G units with 105-in. (2667 mm) PAT Blade.
