WALK-AROUND

- ***High Production and Low Fuel Consumption***

Production is increased during Active mode while fuel efficiency is improved.

- ***Low Fuel Consumption and High Output Engine***

A powerful turbocharged and air-to-air aftercooled Komatsu SAA6D125E-3 provides 246 kW **330 HP**. Low fuel consumption is achieved by adopting an electronic controlled fuel injection system.

Easy Maintenance

- Replacement interval is extended for engine oil, engine oil filter and hydraulic filter
- Easy removal and installation of the radiator and oil cooler
- Fuel tank capacity is increased
- New bushing design on work equipment extends lubricating interval
- Easy access for engine inspection
- High-capacity air cleaner

Large Digging Force

- Arm crowd force is increased 8% and bucket digging force is increased 9% when the Power Max function is applied (compared with PC400LC-6)

Two-Mode Setting for Boom

- Switch selection allows either powerful digging or smooth boom operation

FLYWHEEL HORSEPOWER
246 kW 330 HP @ 1850 rpm

OPERATING WEIGHT
42588–46719 kg
93,890–103,000 lb

Harmony with Environment

- Low emission engine
PC400LC-7's engine is EPA Tier 2 emission certified, without sacrificing power or machine productivity
- Economy mode saves fuel consumption (reduced by approx. 20%)
- Low operation noise

Reduced Revolving Frame Damage

- Clearance between the revolving frame and track increased by 30%

Variable Track Gauge (optional)

- Greatly increases lateral stability and lifting capacity
- Compliant with transportation regulations

Excellent Machine Stability

- Machine stability and balance is improved by a new design counterweight

Higher Lifting Capacity

- PC400LC-7's lateral stability is improved and lifting capacity is increased

Large Comfortable Cab

New PC400-7's cab volume is increased by 14%, offering an exceptionally roomy operating environment

- Highly pressurized cab with automatic air conditioner
- Low noise design
- Low vibration with cab damper mounting
- OPG capable with optional bolt-on top guard

OPG (Operator Protective Guards) top guard level 2 by ISO 10262 (formerly FOG)

GALEO

Komatsu's highly productive, innovative technology, environmentally friendly machines built for the 21st century.

PRODUCTIVITY FEATURES

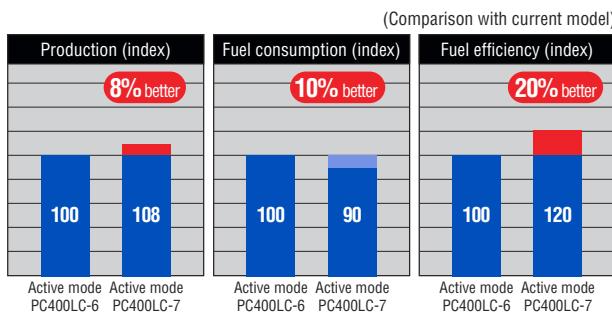

High Production and Low Fuel Consumption

High production and low fuel consumption are achieved through the following two operation modes:

Active mode, with maximum engine output to handle large production, while keeping fuel consumption low; and Eco mode for light duty applications, which enables operation at a speed comparable to Active mode with even lower fuel consumption. The two modes, Active mode for handling “large production” and Eco mode for “low fuel consumption” have been significantly improved.

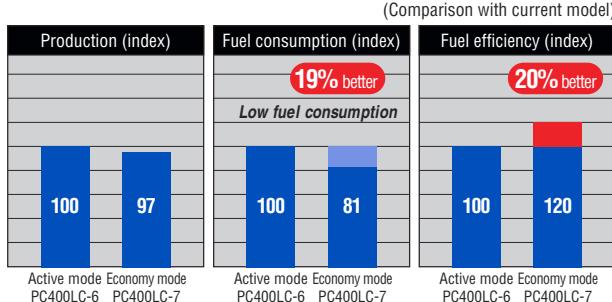

Active Mode

This mode handles large production by providing powerful and quick operation, and achieves economical efficiency by substantial reduction of fuel consumption.

Economy Mode

Operation speed equal to that of the Active mode can be achieved when handling light duty operation while also keeping fuel consumption low.

Electronically Controlled High Power Engine Installed

A 246 kW **330 HP** Komatsu SAA6D125E-3 engine, is the largest in its class. High power and low fuel consumption are achieved by optimizing fuel injection via electronic control. EPA Tier 2 certified.

Improved Digging Force

With the addition of the one-touch power max. function (operation time of 8.5 seconds), the digging force has been further increased.

Maximum arm crowd force (ISO):

20120 kg (44,350 lb) → **21800 kg (48,060 lb)** **8% better***
(with Power Max.)

Maximum bucket digging force (ISO):

25600 kg (56,450 lb) → **28000 kg (61,730 lb)** **9% better***
(comparison with PC400LC-6)
(with Power Max.)

Smooth Loading Operation

Two return hoses improve hydraulic performance. In the arm out function, a portion of the oil is efficiently returned to the tank increasing arm speed.

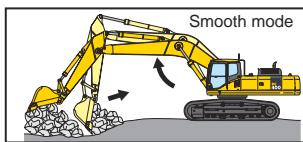

Courtesy of Machine.Market

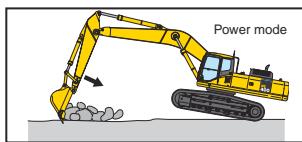

Two Boom Settings

Smooth mode provides easy operation for gathering blasted rock or scraping down operation. When maximum digging force is needed, switch to Power mode for more effective excavating.

Boom floats upward, reducing lifting of machine front. This facilitates gathering blasted rock and scraping down operations.

Boom pushing force is increased, ditch digging and box digging operation on hard ground are improved.

Substantially Improved Stability

Improved lateral stability is achieved by increasing the counterweight (610 kg 1,350 lb) and moving the weight further from the machine center.

Lateral Stability **PC400 - PC400LC** **15% better***

*comparison with current model

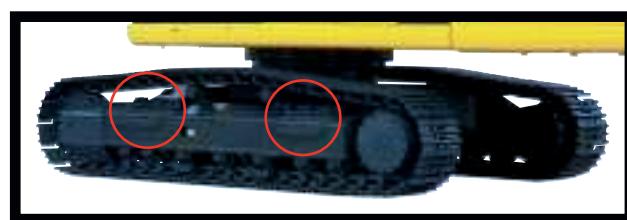

Large Lifting Capacity

PC400LC-7's improved lateral stability increases lifting capacity.

Location		PC400LC-6	PC400LC-7	Increase %
Reach = 20'	Front	20,500 lbs	21,500 lbs	11%
Height = Ground Level	Side	11,800 lbs	12,600 lbs	5%

Variable Track Gauge (optional)

- Lateral stability is significantly improved when operating with the gauge extended
- Lateral stability is increased by 30% (compared with the fixed gauge of the current model)
- Complies with transportation regulations by retracting the gauge

Reduced Revolving Frame Damage

Damage to the revolving frame when going over rocks is reduced by increasing the clearance between the revolving frame and track.

clearance:
approx. 200 mm (7.9")
30% increased

WORKING ENVIRONMENT

The cab interior is spacious and provides a comfortable working environment...

Large Comfortable Cab

Comfortable Cab

New PC400LC-7's cab volume is increased by 14%, offering an exceptionally comfortable operating environment. The large cab enables full flat reclining of the seat back with headrest.

Pressurized Cab

The air conditioner, air filter, and a higher internal air pressure (6.0 mm Aq **0.2"** in Aq) prevent external dust from entering the cab.

Low Noise Design

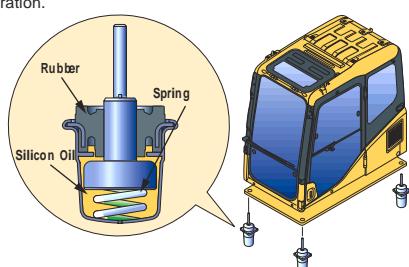

Noise level is remarkably reduced, not only engine noise but also swing and hydraulic relief noise.

Low Vibration with Cab Damper Mounting

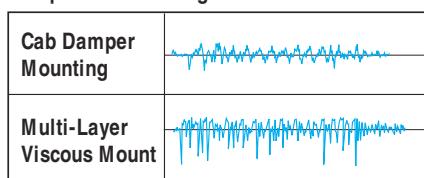

PC400LC-7 uses a new, improved cab damper mount system that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with a strengthened left and right side deck aids vibration reduction at the operator's seat.

Vibration at floor is reduced from 120 dB (VL) to 115 dB (VL).

dB (VL) is index for expressing size of vibration.

Comparison of Riding Comfort

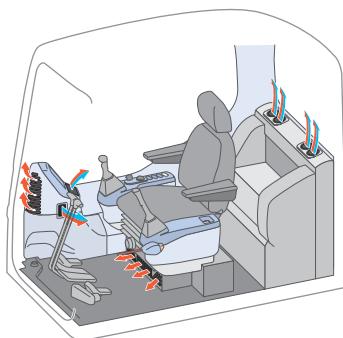

Vertical direction on graph shows size of vibration.

Conditions:
Traveling over obstacle
one side track
Traveling speed forward high

Automatic Air Conditioner

A 6,900 kcal **27,379 Btu** air conditioner is utilized. The bi-level control function keeps the operator's head and feet cool and warm respectively. This improved air flow function keeps the inside of the cab comfortable throughout the year.

Washable Cab Floormat

The PC400LC-7's cab floormat is easy to keep clean. The gently inclined surface has a flanged floormat and drainage holes to facilitate runoff.

Multi-Position Controls

The multi-position, pressure proportional control levers allow the operator to work in comfort while maintaining precise control. A double-slide mechanism allows the seat and control levers to move together or independently, allowing the operator to position the controls for maximum productivity and comfort.

Seat Sliding Amount: 340 mm 13.4", increased 120 mm 4.7"

Defroster

Cab Frame Mounted Wiper

Bottle Holder and Magazine

Safety Features

Cab

OPG (FOG) capable with optional bolt-on top guard.

Wide Visibility

The right side window pillar has been removed and the rear pillar reshaped to provide better visibility. Blind spots have been decreased by 34%.

Pump/engine room partition prevents oil from spraying on the engine if a hydraulic hose should burst.

Thermal and fan guards are placed around high-temperature parts of the engine and fan drive.

Steps with non-skid sheet and large handrail. Steps with non-skid sheet provide anti-slip footing for added safety.

Large Handrail

Non-skid Sheet

Thermal Guard

RELIABILITY/MAINTENANCE FEATURES

Reliability Features

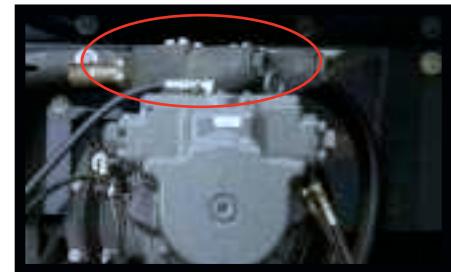

Large Castings Utilized to Improve Strength and Durability

The castings smoothly transfer forces and loads, improving the work equipment and main frame life. They also improve torsional strength.

High-Pressure In-Line Filter

The PC400LC-7 has high pressure in-line filters installed at the pump discharge ports. This protects the hydraulic system from contamination due to the unlikely event of a pump failure.

Easy Maintenance

Easy Removal and Installation of the Radiator (side-by-side cooling)

Removal and installation of the radiator and oil cooler are made easier by locating them side-by-side.

High-Capacity Air Cleaner

High-capacity air cleaner is comparable to that of a larger machine. The increased capacity can extend air cleaner life and prevent early clogging which can result in a power decrease. Reliability is improved by using a new seal design.

Fuel Tank Capacity Increased

Fuel tank capacity is increased from 605 ltr 160 U.S. gal to 650 ltr 172 U.S. gal to extend operating hours before refueling. The fuel tank is treated for rust prevention and improved corrosion resistance.

Reducing Maintenance Costs

Hydraulic oil filter replacement interval is extended from 500 to 1000 hours. Engine oil and filter replacement interval are extended from 250 to 500 hours.

New hydraulic oil filter

VALUE ADDED FEATURES

Multi-Function Color Monitor

A newly developed Multi-Function Color Monitor has multiple functions, such as working mode selection, hydraulic pump oil flow adjustment for matching to attachment, and maintenance interval notice, etc.

Working Mode Selection

The Multi-Function Color Monitor has four selectable working modes (**A**, **E**, **L**, and **B** modes).

Working Mode	Application	Advantage
A	Active mode	<ul style="list-style-type: none"> • Maximum production/power • Fast cycle times
E	Economy mode	<ul style="list-style-type: none"> • Excellent fuel economy
L	Lifting mode	<ul style="list-style-type: none"> • Hydraulic pressure is increased by 7%
B	Breaker operation	<ul style="list-style-type: none"> • Optimum engine rpm, hydraulic flow

When **Lifting Mode** is selected, hydraulic pressure is increased 7% resulting in a 7% increase in hydraulic lift capacity.

EMMS (Equipment Management Monitoring System)

Monitor Function

Controller monitors engine oil level, coolant level, engine oil pressure, coolant temperature, battery charge and air cleaner clogging, etc. If the controller finds any abnormality, it is displayed on the LCD (Liquid Crystal Display).

Maintenance Function

Monitor informs replacement time of oil and filters on LCD when the replacement interval is reached.

Trouble Data Memory Function

Monitor stores error codes for effective troubleshooting.

Hydraulic Pump Oil Flow Adjustment System

When installing attachments (breaker, crusher, etc.) and **B**, **A**, or **E** mode is selected, it is possible to adjust engine and hydraulic pump discharge flow to match attachment characteristics. Selection is possible throughout the LCD. This system also allows throttling of the attachment side discharge flow to provide smooth work equipment movement and compound operation with work equipment and attachment.

When **Active** or **Economy** mode are selected, oil flow to the hydraulic attachment circuit provides two pump flow. The flow can be controlled in two directions to control attachments that require open/close function.

When the **Breaker** mode is selected, the attachment circuit provides oil flow from one pump. The oil flow is one directional and will travel from the attachment to the hydraulic tank.

SPECIFICATIONS

ENGINE

Model	Komatsu SAA6D125E-3
Type	Water-cooled, 4-cycle, direct injection
Aspiration	Turbocharged, air-to-air, aftercooled
Number of cylinders	6
Bore	125 mm 4.92"
Stroke	150 mm 5.91"
Piston displacement	11.04 ltr 674 in³
Flywheel horsepower:	
ISO 9249 / SAE J1349	Gross 259 kW 347 HP Net 246 kW 330 HP
Rated rpm	1850 rpm
Governor	All-speed control, electronic EPA, EU, and Japan Tier 2 emission certified.

HYDRAULICS

Type	HydraMind (Hydraulic Mechanical Intelligence New Design) system, closed-center system with load sensing valves and pressure compensated valves
Number of selectable working modes	4
Main pump:	
Type	Variable displacement piston type
Pumps for	Boom, arm, bucket, swing, and travel circuits
Maximum flow	690 ltr/min 182 U.S. gal/min
Supply for control circuit	Self-reducing valve
Hydraulic motors:	
Travel	2 x axial piston motor with parking brake
Swing	1 x axial piston motor with swing holding brake
Relief valve setting:	
Implement circuits	37.3 MPa 380 kgf/cm ² 5,400 psi
Travel circuit	37.3 MPa 380 kgf/cm ² 5,400 psi
Swing circuit	27.9 MPa 285 kgf/cm ² 4,050 psi
Pilot circuit	3.2 MPa 33 kgf/cm ² 470 psi

DRIVES AND BRAKES

Steering control	Two levers with pedals
Drive method	Hydrostatic
Maximum drawbar pull	329 kN 33510 kgf 73,880 lb
Gradeability	70%, 35°
Maximum travel speed: High	5.5 km/h 3.4 mph
(Auto-Shift) Low	3.0 km/h 1.9 mph
Service brake	Hydraulic lock
Parking brake	Mechanical disc brake

SWING SYSTEM

Drive method	Hydrostatic
Swing reduction	Planetary gear
Swing circle lubrication	Grease-bathed
Service brake	Hydraulic lock
Holding brake/Swing lock	Mechanical disc brake
Swing speed	9.0 rpm
Swing torque	15359 kg·m 111,059 ft lbs

UNDERCARRIAGE

Center frame	X-frame
Track frame	Box-section
Seal of track	Sealed track
Track adjuster	Hydraulic
Number of shoes (each side)	49
Number of carrier rollers	2 each side
Number of track rollers (each side)	8

COOLANT AND LUBRICANT CAPACITY (REFILLING)

Fuel tank	650 ltr 172 U.S. gal
Coolant	34.2 ltr 9.0 U.S. gal
Engine	38.0 ltr 10.0 U.S. gal

STANDARD EQUIPMENT

- Additional fuel filter with water separator
- Air conditioner with defroster, hot & cool box
- Alternator, 50 Ampere, 24V
- Auto-Decel
- Automatic engine warm-up system
- Automatic de-aeration system for fuel line
- Batteries, 140 Ah/2 x 12V
- Boom and arm holding valves
- Cab, capable OPG (FOG) with optional bolt-on top guard
- Counterweight, 9500 kg **20,943 lb**
- Dry type air cleaner, double element
- Electric horn
- EMMS
- Engine, Komatsu SAA6D125E-3
- Engine overheat prevention system
- Fan guard structure
- Hydraulic filters, high pressure
- Hydraulic track adjusters (each side)
- Long lubricating intervals for implement bushings
- Monitor panel, full color
- Power maximizing system
- PPC hydraulic control system
- Radiator & oil cooler dust proof net
- Rear view mirror, RH/LH
- Seat belt, retractable 76 mm **3"**

- Seat, suspension
- Service valve
- Starting motor, 11 kW
- Suction fan
- Track guiding guard, center section
- Track roller, 8 each side
- Track shoe
—700 mm **28"** triple grouser
- Travel alarm
- Two settings for boom
- Working light, 2 (boom and RH)
- Working mode selection system

OPTIONAL EQUIPMENT

- Arms
 - 2400 mm **7'10"** arm assembly
 - 2900 mm **9'6"** arm assembly
 - 3380 mm **11'1"** arm assembly
 - 4000 mm **13'1"** arm assembly
 - 4800 mm **15'9"** arm assembly
- Bolt-on top guard, (Operator Protective Guards level 2 (FOG))
- Boom, 7060 mm **23'2"**
- Cab accessories
 - Rain visor
 - Sun visor
- Cab front guard
 - Full height guard
 - Half height guard
- Corrosion resistor
- Counterweight removal device
- Pattern change valve

- Shoes, triple grouser shoes
 - 800 mm **31.5"**
 - 900 mm **35.5"**
- Straight travel pedal
- Track roller guards (full length)
- Track frame undercover
- Tropical arrangement
- Vandalism guards
- Variable gauge track frame
