Kubota

KUBOTA SUPER MINI-EXCAVATOR

Super-compact. Highly reliable. The efficient Kubota K008-3, with enhanced operator protection, is the super mini-excavator of choice for tough jobs where space is limited.

Kubota E-TVCS engine

Highly trusted in the compact industrial machinery market, the efficient combustion created by our engine's unique Three Vortex Combustion System reduces exhaust emission, noise and vibration. Its layout also puts most components within easy reach for faster maintenance.

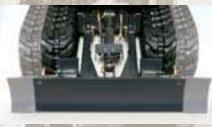

ROPS

For extra protection, a foldable rollover protective structure is standard-equipped on the K008-3. Folding the ROPS down lets you easily transport the mini-excavator on lorries, and travel under doorways to work indoors.

Adjustable track gauge

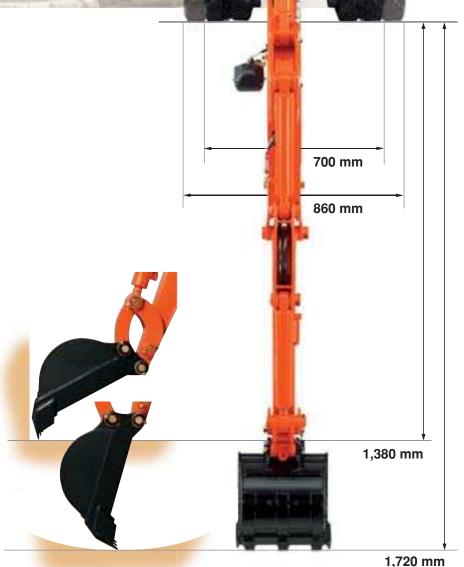

With easy, single-lever operation, the K008-3's hydraulically adjustable track gauge reduces in seconds—down to 700 mm to enable navigation in narrow spaces. Conversely, you can widen the track gauge all the way out to 860 mm to provide a 15% increase in stability, even while operating with hydraulic breakers.

With the simple removal of one pin, its quick-fold blade adjusts in size instantly.

When adjusted down to 700 mm, the K008-3 can easily fit through most doorways, permitting access inside of buildings.

- Quick-release bucket pins

This timesaving feature enables speedy removal and replacement of attachments without any tools.

STATES OF

Kubota

Protected hydraulic service port pipes

With the K008-3, you'll never need to replace the hydraulic service port pipes again. To reduce the risk of damaging the hydraulic piping, the K008-3's service port pipes are hidden inside the boom, and its service ports are conveniently located at the end of the boom.

KUBOTA SUPER MINI-EXCAVATOR

K008-3

Toolbox/manuals

A handy toolbox is conveniently located under the driver's seat. Plus, instruction manuals are stored in a compartment attached to the back of the seat.

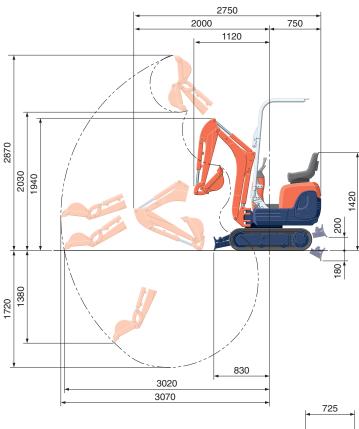

Fully opening engine cover

The engine cover's tilt-up operation exposes most of the engine—providing easier access to components.

Please note: * The lifting capacities are based on ISO 10567 and do not exceed 75% of the static tilt load of the machine or 87% of the hydraulic

lifting capacity of the machine.

* The excavator bucket, hook, sling and other lifting accessories are not included on this table.

* Working ranges are with Kubota standard bucket, without quick coupler. *Specifications are subject to change without notice for purpose of improvement.
