KEY FEATURES

- The only all-hydraulic drive sweeper in the industry.
- Broom angle adjustment at operator's area.
- Single-hand screw adjustment for broom height - no wrenches required.
- 40" sweeping width.
- Repositioned engine and muffler for quieter, safer operation with controls accessible from operator's area.
- Dual drive motors - no wheel bearings or axle shafts to lubricate or wear out. Wheel hubs are mounted directly to drive motors.
- Independent variable ground speed for better performance - ground speed and broom speed can be matched to job conditions.
- Extra large diameter drive wheels and large diameter broom height casters.

Sidewalks
