| L <sub>1</sub> Distance from centre of rotation to centre of tumbler | 2400  |                                                  |                     |
| M Length of crawlers                                                 | 5760  |                                                  |                     |
| F Height of crawlers                                                 | 1040  |                                                  |                     |
| Q Ground clearance of crawler                                        | 375   |                                                  |                     |
| R Distance from edge of horizontal boom foot to crawler              | 3900  |                                                  |                     |
| S Ground clearance of horizontal boom foot                           | 1130  |                                                  |                     |
| T Length of superstructure                                           | 6980  |                                                  |                     |

### Operating Weight and Ground Pressure

The operating weights include the basic unit with B6 crawler tracks, 2 main winches 20 t and 11 m boom, consisting of A-frame, boom foot (5.5 m), boom head (5.5 m) and 12.3 t counterweight.

All systems are ready.

|                               |                                  |
|-------------------------------|----------------------------------|
| with 700 mm flat track shoes  | 55.0 t – 0.80 kg/cm <sup>2</sup> |
| with 800 mm flat track shoes  | 55.6 t – 0.71 kg/cm <sup>2</sup> |
| with 900 mm flat track shoes  | 56.2 t – 0.64 kg/cm <sup>2</sup> |
| with 1000 mm flat track shoes | 56.8 t – 0.58 kg/cm <sup>2</sup> |
| with 700 mm 3-web shoes       | 53.0 t – 0.77 kg/cm <sup>2</sup> |
| with 800 mm 3-web shoes       | 53.5 t – 0.68 kg/cm <sup>2</sup> |
| with 900 mm 3-web shoes       | 54.0 t – 0.61 kg/cm <sup>2</sup> |
| with 1000 mm 3-web shoes      | 54.5 t – 0.55 kg/cm <sup>2</sup> |

# LIEBHERR

The Better Machine

\*) including stay ropes

## Basic machine

with HD undercarriage, without counterweight 12.3 t,  
L 6 cylinder Liebherr diesel engine, 2 x 20 t winches,  
A-frame, boom foot section with boom back stops and  
pulley block with equalizer

|             |    |       |       |       |       |

| L Length | mm | 5950 | 6090 |
| H Height | mm | 1890 | 2035 |

# Transport dimensions and weights

## Engine

Water cooled, in-line 6 cylinder Liebherr diesel engine, turbocharged with intercooler, model D 926 TI-E, power rating according to ISO 9249, 220 kW (300 hp) at 1800 rpm.

Option:

Water cooled, V-8-cylinder Liebherr diesel engine, turbo charged with intercooler, model D 9408 TI-E, power rating according to ISO 9249, 400 kW (544 hp) at 1900 rpm. The automatic limiting load control adapts perfectly the power of the main users to the present engine speed.

The temperature and engine speed controlled cooling system saves energy and reduces the noise emission.

Fuel Tank: 800 l capacity with continuous level indicator and reserve warning.

## Hydraulic System

The main pumps are operated by a distributor gearbox. Axial piston displacement pumps work in closed and open circuits supplying oil only when needed (flow control on demand). To minimize peak pressure an automatically working pressure cut off is integrated. This spares pumps and saves energy.

Winch 1 and 2: Axial piston displacement pumps (swash plate design) with 324 l/min. each.

Crawlers: Axial piston displacement pumps (swash plate design) with 2 x 296 l/min.

Swing gear: Axial piston displacement pump (swash plate design) with 296 l/min.

Boom hoist: Axial piston displacement pump (swash plate design) with 296 l/min.

Max. working pressure: 350 bar.

Hydraulic oil tank capacity: 650 l

The hydraulic oil is cleaned through electronically controlled pressure and return filters.

Possible contamination is signalled in the cabin. The use of synthetic environmentally friendly oils is possible.

Ready made hydraulic retrofit kits are available to customize requirements e. g. powering casing oscillators, auger drills etc.

## Winches

Winch options:

| Line pull (nom. load) | 80 kN  | 120 kN | 160 kN | 200 kN |
|-----------------------|--------|--------|--------|--------|
| Rope diameter :       | 20 mm  | 24 mm  | 26 mm  | 30 mm  |
| Drum diameter :       | 420 mm | 525 mm | 550 mm | 630 mm |
| Rope speed m/min      | 0-148  | 0-136  | 0-114  | 0-92   |
| Rope capacity         |        |        |        |        |
| 1st layer             | 45 m   | 46 m   | 46.5 m | 46.5m  |

The winches are outstanding in their compact design and easy assembly.

Propulsion is via a planetary gearbox in oil bath.

Load support by the hydraulic system; additional safety factor provided by a spring loaded, multi-disc holding brake.

Clutch and braking functions on the freefall system are provided by a compact designed, low wear and maintenance free multi-disc brake. The dragline and hoist winches use pressure controlled, variable flow hydraulic motors.

This system features sensors that automatically adjust oil flow to provide max. winch speed depending on load.

Working with 2 rope clamshell, the oil motors distribute the load to both winches providing speed compensation, even when working in different rope layers.

Option:

Crane winch 80 kN (8 t) – without clutch, but with multi-disc holding brake.

## Noise emission

Special sound proofing results in a very low noise pressure level of 77 dB(A) at 16 m radius.

## Equipment

Lattice boom of tubular construction up to 53 m, universal boom head with interchangeable rope pulleys.

Modular designed equipment for operation as crane, dragline or clamshell.

For dragline operation, a rotating fairlead is fitted into the boom foot. This minimizes rope angle to drum, which results in lower rope wear. Jibs and fly jibs of different lengths are available on request.

## Swing Drive

Consists of single row ballbearing with external teeth for lower tooth flank pressure, fixed axial piston hydraulic motor, spring loaded and hydraulically released multi-disc holding brake, planetary gearbox and pinion.

Free swing with hydraulic moment control reduces wear to a minimum, because rotation moment is sustained through the hydraulic system by the diesel engine.

A multi-disc holding brake acts automatically at zero swing motion.

Swing speed from 0 – 4.7 rpm continuously variable, selector for 3 speed ranges to increase swing precision.

## Crawler

The track width of the undercarriage is changed hydraulically. Propulsion through axial piston motor, hydraulically released spring loaded multi-disc brake, maintenance free crawler tracks, hydraulic chain tensioning device.

Flat or 3 – web track shoes. Drive speed 0 – 1.6 km/h.

Option:

2 speed hydraulic motor for higher travel speed.

## Control

The control system – developed and manufactured by Liebherr – is designed to withstand extreme temperature and the many heavy-duty construction tasks for which this crane has been designed. Complete machine operating data are displayed on a high resolution monitor screen. To ensure clarity of the information on display, different levels of data are shown in enlarged lettering and symbols. Control and monitoring of the sensors are also handled by this high technology system. Error indications are automatically displayed on the monitor in English. The crane is equipped with proportional control for all movements, which can be carried out simultaneously.

A special "Interlock" control system is also optionally available. It is designed for power lifting of the dragline bucket without using the grab winch brake.

An additional option is also the so-called "Redundant" control system, which allows restricted operation of the machine in the event of a failure on the electronic base control or its sensors.

On request, Liebherr also offers special custom designed control systems for free fall winches.

The crane is operated with 2 multi-directional joysticks, right for winch I and boom hoist drive, left for winch II and slewing gear. Crawler control is actuated with the two central foot pedals. Additionally, hand levers can be attached to the pedals.

Options:

- Both main winches with double-T levers
- Special demolition control system
- MDE: Machine data recording
- PDE: Process data recording

## Boom hoist drive

Twin drum with internally located planetary gearbox, axial piston hydraulic motor and hydraulically released spring loaded multi-disc brake.

Max. line pull 2x 50 kN. Rope diameter: 18 mm

Max. line speed: 45 m/min.

Counterweight lifting with boom hoist.

Two speed boom hoist option

# Technical description

12.3 t counterweight

Scope of delivery:

- Basic machine with corresponding track shoes
- Second swing drive with free swing
- A-frame
- Boom foot 5.5 m
- Boom extension 3 m tubular steel
- Boom extension 6 m tubular steel
- Boom extension 9 m tubular steel
- Boom head 5.5 m
- Boom head with interchangeable pulleys
- Main winches according to specification
- Drag rope should be 2 mm below nominal diameter
- Corresponding fair lead
- Corresponding ropes optional
- Dragline bucket optional

| Capacities in metric tons for boom lengths from 14 m to 26 m: |      |      |      |      |      |     |      |      |     | Counterweight 12.3 t |      |     |      |      |     |  |

Max. capacities in metric tons do not exceed 75 % of tipping load

Dragline equipment

## 12.3 t counterweight

### Scope of delivery:

- Basic machine with corresponding track shoes
- A-frame
- Boom foot (5.5 m)
- Boom extension 3 m tubular steel
- Boom extension 6 m tubular steel
- Boom extension 9 m tubular steel
- Boom head 5.5 m
- Boom head with interchangeable pulleys
- Stay ropes according to boom length
- Main winches according to specification
- Tagline winch
- Corresponding ropes optional
- Clamshell optional
- Hoist limit switch
- Load moment limitation
- 4-rope clamshell on request

### Working diagram

- C = Radius / dumping radius
- J = Height of boom head sheave centre above ground level
- K = Length of clamshell (depending on type and capacity of bucket)

| Capacities in metric tons for boom lengths from 11 m to 26 m: |        |        |      |        |        |      |        |        |      |        |        | Counterweight 12.3 t |        |        |     |        |        |     |

| 25                                                            | 11.8   | 6.0    | 9.8  | 14.5   | 7.3    | 7.5  | 17.2   | 8.5    | 5.9  | 20.0   | 9.8    | 4.7                  | 22.7   | 11.1   | 3.9 | 25.4   | 12.4   | 3.2 |

Max. capacities in metric tons do not exceed 66.7 % of tipping load.

Load diagram restricted by safety factors of standard ropes:

|                     |        |        |        |
|---------------------|--------|--------|--------|
| Winches             | 120 kN | 160 kN | 200 kN |
| Rope diameter       | 24 mm  | 26 mm  | 30 mm  |
| Calc. breaking load | 524 kN | 613 kN | 820 kN |
| 1-rope clamshell    | 9.5 t  | 11.1 t | 14.8 t |
| 2-rope clamshell    | 14.1 t | 16.8 t | 22.5 t |

# Clamshell equipment

## 12.3 t counterweight

### Scope of delivery:

- Basic machine with corresponding track shoes
- A-frame
- Pulley block
- Boom foot 5.5 m
- Boom extension 3 m tubular steel
- Boom extension 6 m tubular steel
- Boom extension 9 m tubular steel
- Boom head 5.5 m with interchangeable pulleys
- Stay ropes according to boom length
- Main winches according to specification
- Hoisting limit switch
- Load moment limitation
- Corresponding hook block optional

### Remarks:

1. The lifting capacities are valid for wide track.
2. The lifting capacities stated do not exceed 75 % of the tipping load.
3. The lifting capacities are indicated in metric tons with unlimited swing (360 degrees).
4. The weight of the lifting device must be deducted to arrive at the net lifting capacity.
5. Working radii are measured from centre of swing.
6. Crane standing on firm, horizontal ground.
7. Indicated values on load chart are affected by off-lead operation, wind speeds, load under slew and stop/go movements.

## Crane configuration

| Capacities in metric tons for boom lengths from 11 m to 53 m: |      |      |      |      |      |      |      |      |      | Counterweight 12.3 t |      |      |      |      |      |

The necessary hoist rope reeving arrangement has to be provided according to the load diagram in the cabin.

| <b>Maximum capacity with boom position in longitudinal direction of undercarriage at 7.5 m radius.</b> | <b>25.2 t</b>   | <b>25.2 t</b>   |

Free fall winches with maintenance free, spring loaded multi-disc brake working in an oil bath. Simultaneous working of both winches is assured through our hydraulic system.

Hydraulic supply for casing oscillator  
 $q = 2 \times 296 \text{ l/min.}$   
 $P = 300 \text{ bar max.}$

Mechanical connection casing oscillator on undercarriage.

Automatic operation for one and two rope grabs. (optional)

Hoisting speed will have priority over the casing oscillator while main winches are activated.
