

108 HYLABS

Lattice Boom Crawler Crane 50-ton (50 mt)

- 50 tons (50 mt) at an 11' (3.35 m) radius
- 16,800 lbs (7 620 kg) clam & drag ratings with 70' (21.34 m) of boom
- 140' (42.67 m) conventional angle boom and 110' + 50' (33.53 + 15.24 m) boom + jib combination
- 163' (49.68 m) maximum tip height
- 140' (42.67 m) maximum 360° working radius
- Transports under 90,000 lbs (40 824 kg) with tracks, counterweights and boom base section
- Optional boom folding equipment allows 50' (15.24 m) of boom to be transported on one 93,300 lb (42 321 kg) load or 70' (21.34 m) of boom on one 94,600 lb (42 911 kg) load
- 170 hp (127 kw) Isuzu engine
- Matching front & rear grooved hoist drums for clam work
- Mechanical drum rotation indicators
- 32,323 lb (14 662 kg) maximum winch line pull
- 432 fpm (131.70 mpm) maximum winch line speed
- Fast and easy counterweight self-assembly using pinned backstops
- Completely sealed "oil-filled" lower with compact lower drives
- Optional free spooling 3rd drum (front or rear mount)
- Blocked over-end capacities for increased lift capacities
- Optional extra lift "XL" counterweight package available

108 H5

Lattice Boom Crawler Crane 50-ton (50 mt)

Whatever your requirements, the 108 H5 has big crane features with small crane affordability to get your job done.

- Superb job-site mobility
- Fits in places the big cranes can't
- Superior pile-driving capability
- Operator-friendly
- Transports in one load

Link-Belt
CRANES

Non-slip safety strips and quick storage catwalks provide sure-footed access to the crane upper

Wide-opening doors (upper left), two upper access ladders with hand-rails (left) and fold-up treadmember steps prove that access is the name of the game on the 108 H5.

All sheaves are sealed and maintenance-free, giving HYLAB owners outstanding reliability.

42" x 42" (1.06 m x 1.06 m) angle boom extensions in previous LS-108 42' boom

Attachable bridle guide arms to align bridle and base section for fast, easy bridle-to-boom connection

Pin-on boom hoist bail

Rear-mount fourth drum is available with true gravity free fall

Hydraulic counterweight removal cylinders and pinned backstops for fast and easy counterweight removal

Hydraulic cylinder in carbody for effortless extend/retract

HYLAB hydraulic swing system smoothly rotates on turntable bearing with internal swing teeth. Upper secures into place with a two-position positive house lock

The standard 40' - 140' (12.19 - 42.67 m) angle boom, the most rugged and robust angle boom available, is a top notch performer in dragline, clamshell, pile driving and other severe duty cycle applications.

m) in-line pin-connected interchangeable with m extensions

s are used for connection

Angle boom designed to accommodate both lift crane and duty cycle demands

Link-Belt's standard assembly lift hooks and the easy-to-use counterweight removal system are extremely efficient and simple to use. The lift hooks can also handle boom extensions.

Optional auxiliary tip extension is equipped with two 18.12" (0.46 m) root diameter nylon sheaves, mounted on sealed anti-friction bearings.

The auxiliary 9-ton (8.16 mt) capacity, 5' (1.5 m) tip extension is designed to use instead of a jib to provide clearance between working hoist lines.

The boom top section features standard pin-on points for attachment of options such as a fixed jib, tip extension and adapters for universal pile driving leads with quick reeve ability.

Optional third drum interchangeable with LS-138H II and LS-208H II third drums. Third drum plumbing is standard with routing to both front and rear locations.

Sealed (oil-filled) track rollers, idler and drive planetaries and compact hydrostatic drives add up to outstanding reliability and maintenance-free operation.

Automatic hydraulic track tension

Self-cleaning 36" (0.91 m) track shoes form a wide gauge of 11' 2" (3.40 m) when extended, and 8' 9" (2.67 m) when retracted. Lower structure ground clearance is 16.5" (0.42 m).

The 108 H5 has a dragline/clamshell capacity of 16,800 lbs (7 620 kg). The dragline package includes fairleader as well as bolt-on-front lagging to allow for 7/8" inhaul.

Comfort and control at your fingertips

The spacious HYLAB cab is ergonomically designed for maximum visibility, operating comfort and control with these standard features:

- 18,600 BTU air conditioning and 19,000 BTU heating run through upper and lower vents.
- Rated capacity limiter with load cell located in boom hoist dead end
- Pilot-operated armchair controls with adjustable sliding console
- Foot throttle pedal
- Travel levers conveniently located on right hand console

Strong power plant and bullet-proof hydraulics

Powered by the **biggest and most quiet engine in its class**, the Isuzu engine is fuel efficient and has proven to be 100% reliable. It has a high cooling capacity and provides **high line speeds at higher line pulls**.

The HYLAB Series state-of-the-art variable displacement hydraulic power system features 100% all-hydraulic power. The seven pump "closed loop" design allows for simultaneous, smooth and precise operation of all controls. All this has earned a job-proven reputation of bullet-proof reliability.

Operator's cab console features include:

- Complete engine monitoring
- Free-fall mode indicator
- Anti-two block override switch
- Boom hoist override switch
- Limit alarm indicator light
- System override switch and indicator light
- Front, rear and third drum lock switch
- Backlit instrumentation gauges with warning lamps

The 108 H5 is yet another revolutionary addition to the outstanding Link-Belt HYLAB family with its high mobilization features, unbeatable hydraulic control and unprecedented attachment flexibility.

The 108 H5 has standard toe plates, which enable blocked over-end capacities, challenging higher rated capacity cranes.

The 108 H5 can transport with full counterweight and base section under 90,000 lbs.*

The Link-Belt standard assembly lift hooks allow complete machine assembly without a helper crane.

With optional boom folding equipment, the 108 H5 can move in one load with 50' or 70' of boom.

Another innovative Link-Belt feature is the use of a boom folding system, which eliminates the need to disassemble the boom prior to transport. As a result, 50' (15.24 m) or 70' (21.34 m) can remain installed on the crane in a folded travel position. Boom folding equipment includes folding links, storage links and folding wheel.

One load transport configuration with folded boom

This innovative option allows 50' (15.24 m) of boom to be transported on one 93,300 lb (42,321 kg) load or 70' (21.34 m) of boom on one 98,200 lb (44,543 kg) load.

With your Link-Belt distributor, your crane investment is always protected.

When you invest in a Link-Belt crane, you invest in a 125-year legacy of outstanding customer

support through a worldwide Link-Belt distribution network. The value of a machine starts with state-of-the-art design and quality manufacturing, but excellent product support greatly impacts the fact that Link-Belt cranes traditionally command some of the highest resale prices in the industry.

"... to be recognized as a
leader.
customer service & satisfaction.
— The Link-Belt Way

The right people with the right part at the right time.

Highly trained crane technical specialists get to the core issues quickly to get you going again.

Through the Master Technician Training Program, technicians are specifically tested to establish proficiency in all phases of machine diagnostics and repair. At our Service Training Center, schools are held throughout the spring and fall for both distributor technicians and customers.

Supporting these trained distributor personnel, experienced factory advisors with comprehensive machine records, CAD computer terminals, and technical electronic publication libraries stand ready to isolate facts and quickly act to resolve crane service issues.

With eParts, our online computer system, distributors worldwide can order Genuine Link-Belt Parts 24 hours a day, seven days a week. Our dedicated 72,000 sq. ft. Parts Distribution Center is an integral part of Link-Belt's product support where all parts in stock ship the same business day.

Litho in U.S.A. 11/09 #4370 (supersedes #4296)

Link-Belt Construction Equipment Company is a leader in the design, manufacture and sales of telescopic and lattice boom cranes, with headquarters in Lexington, Kentucky.

In the recent decade, a dynamic and highly focused Link-Belt has emerged as a market leader in crane design and product quality standards by focusing on continuous improvement and employee empowerment.

Link-Belt operates on the principles of continuous quality improvement, ISO 9001, and established values that support the vision of quality. These principles result in reduction in waste, better use of company resources and improved employee and customer satisfaction.

With major capital improvements over the last ten years, along with continuous improvement philosophies, this facility has emerged as the most modern crane facility in North America.
