■ DEFINING CHARACTERISTICS

Remote Control

Stellar Industries was the first U.S. manufacturer to include the state-of-the-art fully proportional multi-functional remote control as a standard feature. The radio remote incorporates a variable speed trigger that allows the operators to feather the crane with precise control. Additionally, the radio remote control handle features engine start/stop functions, compressor on/off, engine speed controls, and an emergency shut-off.

Planetary Drive Winch System

To maximize winch speed, Stellar Industries has incorporated a planetary drive winch system with line speeds up to 60-ft/min (18.29 m), giving the 10628 crane over twice the speed of the competition. In addition to speed, the planetary winch also provides mechanical and hydraulic breaks for added security.

Hexagonal Boom Design

Hexagonal booms are stronger and greatly reduce boom flex and side to side movement.

Greaseless Bushings

Maintenance free greaseless bushings.

Stainless Steel Pivot Pins

Lower maintenance and extend life.

28' of Hydraulic Reach

2-stage hydraulic extensions. No manual extensions.

Dual Acting Counter Balance Valves

Integrated into cylinders.

Flip Sheave Standard

Anti Two-Block Device

10628 CAPACITY CHART

Weight of load handling devices are part of the load lifted and must be deducted from the capacity.

Maximum 1 - part line capacity is 5000 lbs. (2270 kg). For greater loads, use 2 - part line.
