<b>Crane performance data</b>		
Capacity at 3 m from slewing axis (CE / 85% SAE J765)		30 / 32 t
Boom length (retracted/extended)	8.8 / 27.6 m	
Boom head height	30.2 m	

<b>Truck performance data<sup>(1)</sup></b>		
Max. travelling speed (on 14.00R24 tyres)		34 km/h
Max. travelling speed (on 16.00R25 tyres)		35 km/h
Max. theoretical ramp during operation (on 14.00R24 tyres)		106 %
Max. theoretical ramp during operation (on 16.00R25 tyres)		90 %

(1)Standard crane in operating conditions: no auxiliary winch and no extensions

<b>Weights<sup>(2)</sup></b>		
<b>1<sup>st</sup> axle</b>	<b>2<sup>nd</sup> axle</b>	<b>Total</b>
12.75 t	12.75 t	25.5 t

(2)Standard crane: no auxiliary winch and no extensions, on 14.00R24 tyres

<b>Operating speed / times<sup>(3)</sup></b>		
Main winch (max. speed under direct pull)		108 m/min
Auxiliary winch (max. speed under direct pull)		108 m/min
Telescopic boom lifting / lowering		70 / 70 s
Telescopic boom extension / retraction (8.8 m to 27.6 m)		90 / 50 s
Upper structure slewing		30 s
Extension of single outrigger beam		20 s
Extension of single outrigger		30 s

(3)Average reference indicative values

<b>Truck</b>		
Traction/Steering	4x4x4	
Frame	With twin body side member. Front tow point (back tow point on request)	
Outriggers	no. 4 independent hydraulic outriggers onto hydraulic beams. Outrigger beams can be fully retracted, partially or fully extended. Outrigger controls in the operating cab	
Engine	CUMMINS B5.9-C: no. 6 in-line cylinders - displacement 5.88 cu dm - water cooling - turbo supercharger. Max. power 101 kW at 2200 rpm - Max. torque 561 Nm at 1500 rpm. 97/68/CE Step 1 approved	
Tank	240 l	
Transmission	DANA series 20000: Powershift-type transmission with torque converter. 3 + 3 forward speeds and 3 + 3 reverse speed: slow and fast speed mode. Automatic engagement of 4WD after selecting slow speed mode	
Brakes	Operating brakes: double-circuit hydro-pneumatic drum brakes on all wheels. Parking / Emergency brake: negative action onto front transmission shaft. Pneumatic spring brake.	
Axes	no. 2 driving / steering axles equipped with planetary gearboxes into hubs. On request: differential locks	
Suspension	Stiff suspension for front axle, swinging suspension for rear axle. Rear suspension is automatically locked by hydraulic jacks if lifting boom is not aligned with centreline within front crane area	
Steering	Hydrostatic steering controlled by steering wheel into the operating cab. Steering of front axle alone or both axles in concentric or crab mode.	
Tyres	no. 4 14.00R24 tyres On request, no. 4 16.00R25 tubeless tyres	

<b>Upper structure</b>	
Boom	no. 4 rectangular elements
Lifting	no. 1 double action hydraulic jack. Boom inclination: -2° to +78°
Extension	Continuous proportional extension of elements 2 and 3 through double action-double extension hydraulic jack. Continuous proportional extensions of element through inner chain-driven system. Extension under partial load possible
Winch	Controlled by fixed displacement hydraulic motor equipped with axial pistons and planetary gearbox. Automatic negative brake for winch lowering. Cable tensioner. Two different rotation speeds. Rope diameter 15 mm length 175 m. Max. lifting capacity 3800 daN On request, auxiliary winch featuring same specifications as main winch. Rope diameter 15 mm length 150 m
Slewing	360° non-stop rotation controlled by hydraulic motor equipped with planetary gearbox on slewing ring having double ball ring and inner toothed. Automatic negative brake. Brake release for direct alignment of boom along load vertical line
Operating cab	Sliding door. Wide visibility. Equipped with heating system. Front and upper anti-breaking window with windscreens wiper. Upper and back windows can be opened. Fully adjustable seat onto shockproof suspensions. Equipped with tiltable arm rests with integrated hand controls for crane operation
Safety	Stop valves onto extension / lifting boom jacks and outriggers. Max. pressure valves for each hydraulic circuit. Balancing braking valve for the slewing unit. Balancing braking valve for the winch. Limit switch onto boom head for hook block lift. Limit switch for having three winding turns around the winch. Load limiting device with indicator for:  Boom inclination Boom length Load weight Max. load which can be lifted

<b>Systems</b>	
Hydraulic system	Feeding: no. 1 double gear pump and no. 1 double vane pump. Movement control: distributors controlled by hydraulic hand controls. More proportional operations can be carried out at the same time. Outrigger control: solenoid valves controlled by separate buttons. Filtering: no. 1 cartridge filter in return circuit. Heat exchanger for oil cooling-down
Electric system	24 V, 75 A generator and no. 2 132 Ah batteries. Lighting devices in compliance with current EU directives
Pneumatic system	190 cu cm compressor, no. 2 45 l reservoirs and drier. Auxiliary air intake and tyre inflating kit

## OPTIONS

Additional pulley onto boom head
Lattice extension 8 m long
Lattice extension 8 m + 7 m long
Air conditioning / heating system into operating cab
Spare wheel
Operating kit for temperatures up to -20°C
Operating kit for temperatures up to +45°C

### Taglie di sollevamento / Hoist reeving / Mouflage / Hubrollen

Nº di taglie / No. of line Nbr. de brins / Seilanzahl	1	2	3	4	5	6	7	8	9	10	11
Carico massimo in kN Max line pull in kN Charges maxi en kN Höchstlast in kN	38	76	114	152	190	228	266	304	342	380	418

Note	Notes	Notes	Hinweise
I carichi indicati costituiscono i valori massimi coperti dalla garanzia del costruttore per utilizzo rispettivamente secondo le norme della Unione Europea (CE) o secondo la norma SAE J765. Sono espressi in tonnellate metriche ed includono il peso del bozzetto, delle eventuali prolunghe applicate al braccio e di tutti gli accessori di sollevamento (brache, ecc.)	The indicated loads are the maximum covered by the manufacturer's warranty for a use which complies with current EU directives (CE) or SAE J765 standard. Weights are given in metric tons. They include the weight of the block, all extensions fitted to the boom and all lifting accessories (slings and so on).	Les charges indiquées constituent les valeurs maximales couvertes par la garantie du fabricant pour une utilisation conforme aux normes de l'Union Européenne ou selon la norme SAE J765. Elles sont exprimées en tonnes métriques et comprennent le poids de la moufle, des éventuelles extensions appliquées à la flèche et de tous les accessoires de levage (élingues, etc.).	Die angegebenen Lasten sind die Grenzwerte, für welche die Herstellergarantie bei Einsatz gemäß den Normen der Europäischen Union (EU) oder nach der Norm SAE J765 gültig ist. Die Grenzwerte sind in Metertonnen ausgedrückt, das Gewicht des Blocks, eventueller am Ausleger angebrachter Verlängerungen und jeglicher Hebezubehörteile (Schlingen usw.) ist inbegriffen.
Le operazioni di sollevamento nella configurazione su gomme devono essere effettuate su superficie piana e solida con la corretta pressione di gonfiaggio degli pneumatici e con l'oscillazione dell'assale posteriore bloccata qualora l'operazione non avvenga con braccio entro un settore di +/- 3° rispetto all'asse di mezzeria della autogrù.	Crane on wheels: operate the crane on a steady flat surface when hoisting loads and inflate tyres at proper pressure value. Also stop rear axle swinging if the load cannot be lifted having the arm within a +/- 3° sector to the crane centreline.	Les opérations de levage dans la configuration sur pneus doivent être effectuées sur une surface plane et solide avec une pression de gonflage des pneus correcte et l'oscillation de l'essieu arrière bloquée si l'opération n'a pas lieu avec la flèche située dans une zone de +/- 3° par rapport à l'axe de moitié du camion-grue.	Hebearbeiten mit bereitem Kran müssen auf einer ebenen und festen Oberfläche erfolgen; die Reifen müssen richtig gefüllt und die Hinterachse festgestellt sein, wenn der Ausleger außerhalb eines Bereichs von +/- 3° im Verhältnis zur Mittelachse des fahrbaren Krans gehoben wird.
Le operazioni di traslazione con carico possono avvenire esclusivamente con braccio allineato all'asse di mezzeria della autogrù, perno di bloccaggio meccanico della rotazione della sovrastruttura inserito e avendo cura di mantenere il carico stesso in prossimità della autogrù senza oscillazioni.	The load can be travelled only if the boom is aligned with the crane centreline, the shaft for upper structure rotation stop is fitted and the load is kept close to the crane and is not swinging.	Les opérations de translation avec charge ne peuvent être effectuées qu'avec flèche alignée dans l'axe de moitié du camion-grue, goujon de blocage mécanique de la rotation de la partie tournante enclenché et en prenant soin de maintenir la charge à proximité du camion-grue sans oscillations.	Transportarbeiten mit belastetem Ausleger sind ausschließlich erlaubt, wenn der Ausleger an der Mittelachse des Krans angereiht ist, der mechanische Verriegelungszapfen, der die Drehung des Oberwagens verhindert, eingerastet ist und die Last ohne zu schwingen in Nähe des Krans behalten wird.
