

PERFORMANCE COMES STANDARD

WORKS FOR YOU.™

WE'VE GOT YOUR BACKHOE COVERED.

OFFERING YOU MORE.

The Terex[®] backhoe loader makes easy work of any job, from digging to reaching, lifting or loading. Offering versatility, precision and operator comfort without any compromise to performance, the Terex range of Backhoe Loaders offers you and your business more. With more than 50 years in backhoe loader design and engineering you can be sure we have the right products for your job to keep your business moving.

FEATURES:

- ▶ All frequent maintenance points are located together and can be easily accessed from a standing position alongside the machine.
- ▶ Terex[®] backhoes are unstoppable around the job site with nineteen inches of ground clearance.
- ▶ Excellent operator visibility because of an exceptionally narrow boom.
- ▶ Reduced fatigue with ergonomically designed controls and a lumbar-supporting suspension seat.
- ▶ Get the job done faster because tandem gear pumps and a closed loop hydraulic system provide more controlled power.
- ▶ Improve productivity with this strong loader backhoe's excellent lift capacity and bucket breakout force.

TX760B

15,151 lbs (6,887 kg)
87 hp (64.8 kW)
14' 8" (4.46 m)
19' 3" (5.86 m)

TLB840

15,895 lbs (7,210 kg)
88 hp (65.7 kW)
14' 8" (4,490 mm)
19' (5,510 mm)

MODELS

Max Gross Vehicle Weight
Net Engine Power
Standard Dig Depth
Extended Dig Depth

PRODUCTIVE CHOICES

Four models range from 15,151 lbs (6887 kg) to 17,663 lbs (8029 kg) and standard maximum dig depths of 14' 8" (4.46 m) to 15' 11" (4.9 m).

TX860B

15,964 lbs (7,241 kg)
94 hp (70.3 kW)
14' 8" (4.46 m)
19' 3" (5.86 m)

TX870B

16,986 lbs (7,721 kg)
94 hp (70.3 kW)
15' 11" (4.9 m)
20' 4" (6.2 m)

TX970B

17,663 lbs (8,029 kg)
94 hp (70.3 kW)
15' 11" (4.9 m)
20' 4" (6.2 m)

ENGINEERED TO DELIVER.

INCREASED PRODUCTIVITY

Terex[®] loader backhoes increase productivity by increasing bucket rotation. Our bucket linkage design allows operators to drive into a pile and roll back 45 degrees. Our machines also dump at 57 degrees for greater fill capacity and better discharge — enough to boost your bottom line.

MAXIMUM SUPPORT AND STABILITY

All four of our loader backhoe models offer a standard front counter weight for greater fore and aft stability. Our stabilizer legs feature lock-out valves in the circuit so they remain down during operation, providing better stability when you're working 90 degrees of the side of the machine. Plus, we include a flip-over stabilizer foot with rubber pads on one side for street applications and two cleats on the other side for soil work.

INCREASED EFFICIENCY

The dual functionality of Terex[®] loader backhoes allows contractors to combine the power of a wheel loader and the versatility of an excavator into one dynamic machine, increasing productivity and cutting operation costs.

ROUGH WORK SITES, NO PROBLEM

We position our TRAC rod steering system on the back side of the axle, mounting it high enough to maintain significant ground clearance. This is especially important when you're working in rocky conditions and want to avoid potential damage to your undercarriage.

DESIGNED TO LAST

From our low-emission engines to our advanced hydraulic system to our heavy-duty frames and undercarriages, Terex® loader backhoes are designed to work in adverse conditions and deliver a smooth, reliable and cost-effective performance – day after day after day.

MAINTENANCE MADE SIMPLE.

MAXIMUM UPTIME

Terex® loader backhoes are designed to make maintenance quick and easy. A single bucket cylinder on the front end of the machines reduces wear and the number of pins and bushings that require maintenance.

On the back end, a rear tilting hood gives operators easy, ground-level access to the engine and transmission; forward-tilting hoods are much more restrictive and require you to close the hood before you can lift the loader arms.

Plus, we locate all serviceable components on the left-hand side of the machine, making daily maintenance checks quick and easy.

Terex® loader backhoes are versatile and easy to transport thanks to legs that fold up inside the width of the tires and automatically lock up so they don't float down.

COMFORT WRAPPED PRODUCTIVITY.

COMFORT BUILT IN

Climb inside our loader backhoes and you'll see why operators prefer our machines over the competition. Terex cabs provide abundant head, shoulder and leg room.

EXCELLENT VISIBILITY

An exceptionally narrow boom gives the operator better visibility in the trench for digging operations.

Cabin Features

- ▶ A lumbar-supported suspension seat comes standard.
- ▶ Ergonomically designed wobble sticks and adjustable armrests reduce fatigue.
- ▶ Low-effort controls are conveniently grouped and set to either side of the seat to improve access.
- ▶ Large front, back and side windows provide a clear view.

The Terex[®] equipment line includes compact track loaders, wheel loaders, excavators, tractor loader backhoes, telehandlers, site dumpers, light towers, and more. Your local Terex distributor not only offers a wide range of compact equipment, but also backs each machine with premium customer-support services from Terex.

For more information, machine demonstrations or details on purchase, lease and rental plans, contact your local Terex distributor.
