

TIDD CRANE

SMART CRANE

Quality Finish

Finished to a high automotive standard, the TIDD Crane features a forward mounted integral ROPS two man cabin for unrivalled safety, operator position and comfort. TIDD Hydropneumatic front suspension provides outstanding ride on road and when locked out, a super stable platform (even in slew). The engineered rear four leaf parabolic spring suspension completes the ride.

Capable Workhorse

A wheelbase of only 4.4m and at only 2.5m wide, this is a small and light crane. The carry deck on the left front has a 2t allowance for rigging and additional gear. Chain and hook lockers are accessed easily from the front and a large under cab waterproof locker provides dry storage for slings.

TIDD CRANE |||| BETTER CRANE

Superior Technology

Hi Tensile Steel Booms give superior strength and a lower COG that achieves superior lift charts. The easily deployable 1.4t counterweight gives the TIDD the best chart in the 25t pick and carry class with the ability to road its own counterweight.

Extremely Manoeuvrable

Slewing up to 42 degrees each side combined with a short 4.3m forward projection means the TIDD achieves an outstanding turning circle radius of only 14.42m. Working well inside the MAC25 radius (16.59m) the TIDD beats the MAC footprint by 2.17m and at only 2.5m wide, this crane is not restricted like wider machines.
