## ECO-095 & ECO-295

Introducing the latest in mini crane engineering, the UNIC battery powered Eco-095 and Eco-295 models provide fume-free lifting for sensitive environments.

Ideal for food processing plants, listed buildings, airports, clean environments and even cruise ships, these unique spider cranes are powered by a rechargeable 48v battery with no diesel emissions impacting on the surrounding atmosphere.

Measuring just 750mm wide, the new Eco spider cranes are designed for interior access and retain all the lifting power of our standard models without compromising on operational efficiency.

Alongside cutting edge technology, these innovative machines are the first spider cranes to feature low marking wheels for ultimate manoeuvrability when working on light-coloured or polished floor surfaces, making them the ideal choice for shopping centres, galleries, hospitals and more
