

Leading through passion.

Cold Milling Machines

W 100 R | W 100 Ri | W 120 R | W 120 Ri

At a glance: outstanding features of the new cold milling machines

02
03

Highlights in operation (pages 4/5)

1 | INTUITIVE, PRECISE LEVELLING WITH LEVEL PRO PLUS

- > Easy and intuitive operation
- > Many newly added complementary and automated features
- > Fully integrated into the machine management system
- > Milling depth measurement via displacement sensors in the hydraulic cylinders of the side plates
- > Hydraulically telescoping levelling arm

2 | MULTIFUNCTIONAL ARMREST BOOSTS EFFICIENCY

- > Ergonomically designed multifunctional armrest with colour control screen
- > User-programmable "Favourites" keys
- > Job data are recorded and displayed on the control screen

3 | OPTIMIZED VISIBILITY FOR PRECISE OPERATION

- > Unobstructed view of the right-hand side plate
- > Good rear visibility
- > High-quality camera system

4 | OPERATOR COMFORT

- > Rotating, heated driver's seat
- > Electrical water tank filling level indicator
- > Convenient machine access including "Welcome" and "Go home" lights
- > Wind and weather protection elements on the operator's platform

Highlights in driving and steering (pages 6/7)

5 | DYNAMIC AND QUICK MANOEUVRING

- > Travel speed of up to 7,5 km/h
- > Reversing with the milling drum switched on
- > Quick, precise height adjustment
- > Memory function for height adjustment
- > Electronically controlled traction drive

Highlights in performance and productivity (pages 10/11)

9 | HIGH EFFICIENCY FOR TREMENDOUS PRODUCTIVITY

- > Variable supplementary weights of up to 400 kg
- > Many new automated functions
- > Automated process of lowering the milling drum into working position including relief sensors
- > Hydraulically engaging power belt tensioner
- > State-of-the-art WITOS Telematics System
- > Optimized ease of servicing

10 | LOW EMISSION LEVELS

- > Engine models complying with EC Stage 3a/US Tier 3 emission standards or the stringent EC Stage 4/US Tier 4f emission standards
- > Standard diesel particulate filter for model complying with EC Stage 4/US Tier 4f
- > Three different milling drum speed options
- > Optimized soundproofing and heat insulation
- > Speed-governed fan drive

6 | MAXIMUM MANOEUVRABILITY

- > Highly precise steering via the fingertip steering feature integrated in the armrest
- > Swift steering using the steering wheel
- > Extremely large locking angle of the front wheels
- > Compact machine dimensions

Highlights in milling and loading (pages 8/9)

7 | SUPERIOR CUTTING TECHNOLOGY BOOSTS PERFORMANCE

- > Extremely hard-wearing HT22 quick-change toolholder system as a standard feature
- > Hydraulic tool extractor for the quick replacement of cutting tools
- > Overload sensor at the scraper blade and proactive floating position at the side plates, left and right
- > Water spray volume adjustable electrically from the operator's platform

8 | HIGH LOADING CAPACITY FOR MAXIMUM PERFORMANCE

- > Hydraulic folding conveyor can be folded up quickly during operation on site
- > Wide conveyor slewing angles
- > Quick-release coupling for easy mounting and removal of the discharge conveyor

Highlights in operation

04
05

INTUITIVE LEVELLING

The new LEVEL PRO PLUS levelling system is easy and intuitive to use, and thus guarantees exceedingly accurate milling results.

FULLY INTEGRATED LEVELLING SYSTEM

A high degree of automation is enabled by the full integration of the LEVEL PRO PLUS levelling system with the machine control system.

HEIGHT MEASUREMENT SENSORS

Heavy-duty displacement sensors located in the hydraulic cylinders mounted on the protective side plates accurately measure the milling depth and transfer this information onto the high-resolution LEVEL PRO PLUS control screen.

CAMERA SYSTEM

The high-quality camera system provides the operator with a high-resolution image of the milling edge or point of material discharge.

JOB DATA

Pertinent job details are provided automatically to allow the display of daily performance rates.

MULTIFUNCTIONAL ARMREST

The multifunctional, individually adjustable armrest combines innovative design and perfect user-friendliness. Important information is displayed on the colour control screen.

"FAVOURITES" KEYS

Four "Favourites" keys can be programmed with 20 different functions.

REAR VISIBILITY

The compact loading conveyor suspension system permits good visibility of the milled surface at the rear of the machine.

VIEW OF THE AREA AHEAD OF THE MILLED SURFACE

The geometry of the operator's platform has been optimized to ensure an unobstructed view of the right-hand side plate.

ADDITIONAL LEVELLING FEATURES

The LEVEL PRO PLUS levelling system provides many automated and supplementary features, including the automatic lowering of the milling drum to the set milling depth.

LEVELLING ARM

The telescoping levelling arm allows sensing along reference surfaces at a distance of up to 2.0 m to the side of the machine, ensuring perfect milling results even in complex levelling situations.

ELECTRICAL WATER FILLING LEVEL INDICATOR

The water tank filling level can be checked conveniently via the control screen.

ERGONOMIC DRIVER'S SEAT

The driver's seat with integrated seat heating can be rotated to the left and right to offer a good view to the side and to the rear.

"WELCOME" AND "GO HOME" LIGHTS FEATURE

The access ladder and operator's platform are fully illuminated when approaching or walking away from the machine.

WEATHER PROTECTION

Additional wind and weather protection elements on the operator's platform offer protection from exposure to rain and wind.

View of the area ahead of the milled surface.

LEVEL PRO PLUS levelling system.

Highlights in driving and steering

06
07

SWIFT STEERING

The steering wheel is used for particularly quick steering.

FINGERTIP STEERING

The highly responsive hydraulic steering system enables the machine to be steered quickly and effortlessly also via the right-hand armrest.

REVERSING

Reversing with the milling drum switched on permits fast and easy manoeuvring on the job site.

LARGE STEERING ANGLE

Large steering angles to the left and right guarantee small turning radii.

ELECTRONIC TRACTION DRIVE CONTROL

The electronically controlled traction drive with two transport and two milling speeds allows precise manoeuvring for highly precise milling results.

COMPACT MACHINE DESIGN

Its compact design enables the small milling machine to work in narrow passages and ensures ease of transport.

MAXIMUM SPEED OF 7.5 KM/H

The machine's travel speed of up to 7.5 km/h ensures the quick completion of construction projects.

QUICK HEIGHT ADJUSTMENT

Electro-hydraulic height adjustment enables precise adjustment of the milling depth.

MEMORY FUNCTION FOR HEIGHT ADJUSTMENT

To allow quick, convenient height adjustment, three different height positions per machine side can be saved on memory buttons in the multifunctional armrest.

Large steering angle at the front.

Highlights in milling and loading

08
09

QUICK-ACTING HYDRAULIC FOLDING CONVEYOR

The hydraulically folding discharge conveyor is folded up quickly regardless of the job situation and for transport purposes.

LARGE SLEWING ANGLE

Large conveyor slewing angles of 25° each to the left and right enable the milled material to be loaded even in difficult situations.

ALTERNATIVE MILLING WIDTHS

Milling widths FB600 and FB1000 are available for the W 100 R/W 100 Ri. Milling width FB1200 is available for the W 120 R/W 120 Ri.

OVERLOAD SENSORS AND ACTIVE FLOATING POSITION

These smart, automated functions prompt the scraper blade or side plates to be raised briefly, for example, to prevent sinking in on soft ground.

HT22 HEAVY-DUTY QUICK-CHANGE TOOLHOLDER SYSTEM

The extremely hard-wearing HT22 quick-change toolholder system (standard) minimizes breaks in operation and increases the lifespan of the entire milling drum.

HYDRAULIC TOOL EXTRACTOR

The hydraulically operated tool extractor assists the machine operator in replacing the cutting tools.

ELECTRICALLY ADJUSTABLE WATER SPRAY VOLUME

The water spray volume can be adjusted from the operator's platform to ensure reliable tool cooling, prevent dust development and enable extended uptimes.

QUICK-RELEASE COUPLING

The innovative quick-release coupling ensures easy plugging and unplugging of the hydraulic connections when mounting or removing the discharge conveyor.

VARIOUS MILLING DRUMS

A vast array of original WIRTGEN standard and special milling drums is on offer to cater to a wide range of applications.

The highly effective WIRTGEN milling drums deliver excellent milling performance.

Highlights in performance and productivity

10
11

EXHAUST GAS AFTER-TREATMENT FOR W 100 Ri, W 120 Ri

For effective exhaust gas purification, the diesel engine is equipped with a two-way catalytic converter, diesel particulate filter and SCR catalytic converter, thus complying with the strict requirements of the currently highest emission standards EC Stage 4/US Tier 4f.

ENGINE COOLING

Cooling system with temperature-controlled fan speed for low noise emission levels.

ADBLUE®/DEF TANK FOR W 100 Ri, W 120 Ri

Storage container for urea solution with easily accessible filling port.

SCR CATALYTIC CONVERTER

The integrated SCR catalytic converter and added, special urea solution reduce nitrogen oxides.

COMBINATION OF TWO-WAY CATALYTIC CONVERTER/DIESEL PARTICULATE FILTER

Catalytic converter oxidizing hydrocarbons and carbon monoxides. Standard diesel particulate filter ensuring compliance with even stricter exhaust emission specifications.

OPTIMIZED EASE OF SERVICING

Excellent accessibility to all check points and points of maintenance minimizes maintenance requirements.

ANTI-VIBRATION MOUNTED ENGINE STATION

The anti-vibration mounted engine station ensures low vibration and noise levels, thus offering high driving comfort.

LARGE DIESEL TANK

The large diesel tank enables extended machine uptimes.

SUPPLEMENTARY WEIGHTS

Supplementary weights of up to 400 kg altogether provide for high operating weight, optimum traction and effortless transport.

DIFFERENT MILLING DRUM SPEEDS

Three different milling drum speeds enable tremendous milling outputs in a wide range of applications.

SOUNDPROOFING AND HEAT INSULATION

Effectively optimized soundproofing and heat insulation significantly reduce noise emission levels.

HYDRAULIC POWER BELT TENSIONER

The automatically engaging, hydraulically operated power belt tensioner enables efficient and reliable transmission of power.

STATE-OF-THE-ART WITOS TELEMATICS SYSTEM

The efficient WIRTGEN WITOS FleetView telematics system supports fleet management, machine position and status monitoring, as well as maintenance and diagnostic procedures.

AUTOMATED LOWERING OF THE DRUM INTO WORKING POSITION

The integrated, automated feature of lowering the milling drum into working position uses relief sensors to significantly facilitate machine operation.

MANY NEW AUTOMATED FUNCTIONS

The WIDRIVE machine management system greatly improves operator comfort and increases performance by controlling the engine speed and travel speed or switching the water spray system on and off.

*W 100 R, W 120 R for EC Stage 3a / US Tier 3:
high-performance, fuel-efficient engine technology.*
