

Leading through passion.

Cold milling machine

W 150 CF | W 150 CFi

At a glance: outstanding features of the new cold milling machine

02
03

Highlights in operation (pages 4/5)

1 | INTUITIVE, PRECISE LEVELING WITH LEVEL PRO PLUS

- > Simple, intuitive handling
- > Fully integrated into the machine management system
- > New hydraulic cylinders at the side plates with integrated measuring sensors for leveling control
- > Hydraulic sensor scanning in front of the milling drum
- > Leveling arm including laser sensor

2 | MULTIFUNCTIONAL ARMREST FOR INCREASED EFFICIENCY

- > Ergonomically designed multifunctional armrest with color control screen
- > User-programmable "Favorites" keys
- > Scraper position is displayed on the control screen
- > Job data are recorded and displayed on the control screen

3 | OPTIMIZED VISIBILITY FOR PRECISE OPERATION

- > Adjustable protective canopy
- > High-quality camera system comprising up to five cameras
- > Perfect visibility during night operations thanks to optimized working light arrangement and optional LED working lights

4 | OPERATOR COMFORT

- > Rotating, heated driver's seat
- > Additional controls for ground staff
- > Convenient access including "Welcome" and "Go home" lights feature
- > Wind and weather protection elements on the operator's platform

Highlights in driving and steering (pages 6/7)

5 | DYNAMIC AND QUICK MANEUVERING

- > ISC electronic track control for minimized track pad wear and optimum traction
- > Travel speed of up to 4.6 mph (7.5 km/h)
- > Optimized PTS for automatic alignment of the machine parallel to the road surface
- > "Stop-and-go" system for the truck driver

6 | MAXIMUM MANEUVERABILITY

- > Large steering angle for small turning circles
- > Highly precise steering via fingertip steering system
- > Low-weight machine with variable ballasting weight of up to 1,984 lbs. (900 kg)
- > Additional height adjustment in increments of 0.04 in. (1 mm) or 0.2 in. (5 mm)

Highlights in performance and productivity (pages 10/11)

9 | HIGH EFFICIENCY FOR TREMENDOUS PRODUCTIVITY

- > Tremendous engine power with high maximum torque
- > Three different milling drum speed options
- > Battery-operated hydraulic power pack with additional functions
- > Automatically controlled water spray system at the milling drum unit
- > WIDRIVE automated functions significantly reduce operator interventions

10 | LOW EMISSION LEVELS

- > Engine models complying with EU Stage 3a/US Tier 3 emission standards or the stringent EU Stage 4/US Tier 4f emission standards
- > Alternative engine station with additional exhaust gas purification by means of a diesel particulate filter
- > Effective soundproofing and controlled fan speed for minimized noise emission levels

Highlights in milling and loading (pages 8/9)

7 | SUPERIOR CUTTING TECHNOLOGY BOOSTS PERFORMANCE

- > Extremely hard-wearing HT22 quick-change toolholder system as a standard feature
- > Milling drum turning device and hydraulic tool extractor for the quick replacement of cutting tools
- > New, full FCS FB 1500 milling drum unit with easily exchangeable FB600, FB900, FB1200 and FB1500 milling drums
- > Overload sensor at the scraper blade and proactive floating position at the side plates, left and right

8 | HIGH LOADING CAPACITY FOR MAXIMUM PERFORMANCE

- > Extremely large conveyor slewing angle of 60° to the left and right
- > Two conveyor slewing speeds for precise loading of the milled material
- > Optimized VCS suction channel for minimum cleaning effort
- > Hydraulic folding conveyor can be folded up quickly during operation on site
- > Quick-release coupling for easy mounting and removal of the discharge conveyor

Innovations in operation

INTUITIVE LEVELING

The new LEVEL PRO PLUS leveling system offers simple and intuitive operation, guaranteeing high-quality, highly precise milling results.

FULLY INTEGRATED LEVELING SYSTEM

Full integration of the LEVEL PRO PLUS leveling system into the machine management system allows a high degree of automation.

LEVELING OPERATION

The reference line is scanned by high-precision displacement sensors installed in the hydraulic cylinders of the side plates and then displayed on the high-resolution LEVEL PRO PLUS control screen.

VISIBILITY

Numerous intelligently arranged working lights - in LED design at the customer's request - provide optimum visibility during night operations.

CAMERA SYSTEM

The high-quality camera system comprising up to five high-resolution cameras shows the left machine side or the point of discharge of the milled material into the truck.

SCRAPER POSITION

The scraper position is detected by means of a displacement sensor and then displayed on the control screen.

MULTIFUNCTIONAL ARMREST

The multifunctional, individually adjustable armrest combines innovative design and excellent user-friendliness. Important information is displayed on the color control screen.

HYDRAULIC SENSOR SCANNING IN FRONT OF THE MILLING DRUM

A hydraulic sensor detects the reference height in front of the milling drum.

LEVELING ARM INCLUDING LASER SENSOR

The laser sensor can be moved laterally by up to 13 ft. 1.5 in. (4 m) by means of a hydraulically operated leveling arm.

"FAVORITES" KEYS

Four "Favorites" keys can be programmed with 20 different functions.

JOB DATA

Pertinent job details are provided automatically to allow the display of daily performance rates.

PROTECTIVE CANOPY

Protective canopy with laterally telescoping extensions and movable glass windows front and rear.

ERGONOMIC DRIVER'S SEAT

The driver's seat with integrated seat heating can be rotated to the left and right to offer a good view to the side and to the rear.

ADDITIONAL CONTROLS FOR GROUND STAFF

Convenient control functions enable the drum to be turned for the replacement of cutting tools, or scanning in front of the milling drum to be activated.

"WELCOME" AND "GO HOME" LIGHTS FEATURE

The access ladder and operator's platform are fully illuminated when approaching or walking away from the machine.

WEATHER PROTECTION

Additional wind and weather protection elements on the operator's platform offer protection from exposure to rain and wind.

LEVEL PRO PLUS leveling system.

View of the area ahead of the milled surface.

Highlights in driving and steering

FINGERTIP STEERING

The highly precise hydraulic steering system enables the machine to be steered quickly and smoothly also via the right-hand armrest.

LARGE STEERING ANGLE

The large steering angle of the front axle guarantees extremely small turning circles.

SUPPLEMENTARY WEIGHT

The machine's low empty weight and a variable ballasting weight of up to 1,984 lbs. (900 kg) provide for high operating weight, optimum traction and ease of transport.

ELECTRONIC TRACK CONTROL

The ISC electronic track control minimizes track pad wear and ensures optimum traction regardless of ground conditions.

MAXIMUM SPEED OF 4.6 MPH. (7.5 KM/H)

The machine's travel speed of up to 4.6 mph. (7.5 km/h) ensures the quick completion of construction projects.

AUTOMATIC ALIGNMENT PARALLEL TO THE ROAD SURFACE

The PTS (Parallel to Surface) system with four-fold full-floating feature has been optimized further to ensure quick and reliable parallel alignment of the machine as well as perfect leveling results.

HEIGHT ADJUSTMENT IN INCREMENTS

A new feature on the left control console enables precise adjustment of the milling depth in increments of 0.04 in. (1 mm) or 0.2 in. (5 mm) respectively.

STOPLIGHT SYSTEM

The "stop-and-go" system folds out hydraulically and enables visual, silent communication with the truck driver driving in front.

Large steering angle at the front.

Highlights in milling and loading

FULL FCS FOR DIFFERENT MILLING WIDTHS

FB600, FB900, FB1200 and FB1500 milling drums are available as part of the full FCS option. The milling drums are exchanged quickly thanks to the side door on the right offering ready access.

QUICK-RELEASE COUPLING

The quick-release coupling ensures easy plugging of hydraulic connections when mounting or removing the discharge conveyor.

HT22 HEAVY-DUTY QUICK-CHANGE TOOLHOLDER SYSTEM

The extremely hard-wearing HT22 quick-change toolholder system (standard) minimizes breaks in operation and increases the lifespan of the entire milling drum.

HYDRAULIC FOLDING CONVEYOR

The hydraulically folding discharge conveyor is folded up quickly and easily regardless of the job situation and for transport purposes.

EXTREMELY LARGE SLEWING ANGLE

Large conveyor slewing angles of 60° each to the left and right enable the milled material to be loaded even in difficult situations, for example, in road junctions or turning bays.

VARIABLE SLEWING SPEED

Slewing the discharge conveyor at slow speed or high speed to ensure precise loading of the milled material optimizes the entire milling process.

MILLING DRUM TURNING DEVICE

The hydraulically operated milling drum turning device and cutting tool extractor make easy work of tool replacement even with the engine switched off.

OVERLOAD SENSORS AND ACTIVE FLOATING POSITION

These smart, automated functions prompt the scraper or side plates to be raised briefly, for example, to prevent sinking in on soft ground.

OPTIMIZED VCS SUCTION CHANNEL

The suction channel of the Vacuum Cutting System has undergone a redesign to reduce the cleaning effort.

WEAR PROTECTION SEGMENTS

The durability of the side plates has been improved by bolt-on wear protection segments.

MILLING DEPTH OF 12 IN. (330 MM)

The new cold milling machine achieves a maximum milling depth of 12 in. (330 mm).

INCREASED LOADING PERFORMANCE

The conveyor belt speed has been increased by 15% and the cleat profile enlarged by 28% in comparison with the predecessor model to enable significantly higher loading performance.

The highly effective WIRTGEN milling drums deliver excellent milling performance.

Highlights in performance and productivity

W 150 CFi EXHAUST GAS AFTER-TREATMENT

For effective exhaust gas purification, the diesel engine is fitted with both a two-way catalytic converter and SCR catalytic converter, thus complying with the strict requirements of the currently highest emission standards EU Stage 4 / US Tier 4f.

TWO-WAY CATALYTIC CONVERTER

Catalytic converter oxidizing hydrocarbons and carbon monoxides.

W 150 CFi AdBlue® / DEF tank

Storage container for urea solution with easily accessible filling port.

MECHANICAL MILLING DRUM DRIVE

Highly efficient belt drive for reduced fuel consumption.

SCR catalytic converter

The integrated SCR catalytic converter and added, special urea solution reduce nitrogen oxides.

ENGINE COOLING

Cooling system with temperature-controlled fan speed for low noise emission levels.

HIGH ENGINE POWER

High engine power and optimum torque curve guarantees fast operation and high production rates even at the maximum milling depth.

DIFFERENT MILLING DRUM SPEEDS

Three different milling drum speeds enable tremendous milling outputs in a wide range of applications.

BATTERY-OPERATED HYDRAULIC POWER PACK

The extended electro-hydraulic power pack caters to functions such as the milling drum turning device, cutting tool extraction with the engine switched off, or emergency functions, thus increasing the machine's flexibility on site.

LOAD-CONTROLLED WATER SPRAY SYSTEM

The amount of water injected to cool the cutting tools increases automatically relative to the increase in engine load. Water consumption can also be directly adjusted electrically from the operator's platform.

FEWER OPERATOR INTERVENTIONS

The WIDRIVE machine management system includes many new automated features relieving the operator from part of his workload.

OPTIONAL DIESEL PARTICULATE FILTER

The diesel particulate filter is optionally available as original equipment, ensuring compliance with even stricter emission requirements.

MINIMUM NOISE LEVELS

Optimized machine settings and even more effective soundproofing significantly reduce noise emissions.

W 150 CF for EU Stage 3a/US Tier 3: high-performance, fuel-efficient engine technology.

Technical specification

	W 150 CF	W 150 CFi
Operator's stand		
Digital multi-function display for all important operating conditions	■	■
Operating panel nighttime lighting	■	■
Robust anti-vandalism protection for the controls	■	■
Adjustable steering wheel position	■	■
Optimally positionable operator's seat	■	■
Footstep right and left with conveniently folding ladder	■	■
Two mirrors front, one mirror middle and one mirror in rear area of the machine	■	■
Standard operator's seat	□	□
Under-carriage and height adjustment		
LEVEL PRO PLUS leveling system. Measurement by travel measuring sensors in the side plate cylinder. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS operating display. Including preliminary equipment for additional sensors.	■	■
Jog mode for height adjustment	■	■
High machine stability due to quadruple pendulum axle	■	■
PTS - machine automatically guided parallel with the road surface	■	■
ISC - intelligent track speed control with hydraulic four chain drive	■	■
Scraper height is shown on the display	■	■
Reversing with the drum rotating; simple and fast maneuvering	■	■
Equipped with extremely wear-resistant 2-piece polyurethane track pads	■	■
Others		
Automatic water management	■	■
Large tool package	■	■
Large water and diesel tanks	■	■
Total of 3 EMERGENCY STOP switches at sensible positions on the machine	■	■
Machine preparation for installing the control unit for WITOS FleetView	—	■
"Welcome" and "Go home" lights feature including LED lighting in the area of the operator's access and platform	■	■
European type test certificate and CE conformity	■	■
Paint standard cream white RAL 9001	□	□
Halogen/LED lighting package including rotating beacon	□	□
Electrohydraulic unit	□	□
